CITY DOCUMENTS
OF THE
CITY OF LOWELL

MASSACHUSETTS

FOR THE
YEAR 1926

EXTRACTS FROM THE ORDINANCES
OF LOWELL

CHAPTER VIII — CITY DOCUMENTS

SECTION 5. All City Documents (except the Rules and Regulations for the Government of the Police and Fire Departments) shall be printed in pamphlet form of the size of the Annual Report of the School Committee.

SECTION 6. All City Documents shall be bound together in one volume, under the direction of the City Clerk, and three or more copies shall be placed in the City Library, and one copy in the Library of the Middlesex Mechanics' Association, one copy shall be sent to each City of the Commonwealth, to the Library of the Harvard College, the Public Library of Boston, the State Library, the Smithsonian Institute at Washington, and the Old Residents' Historical Association of Lowell.

CONTENTS

1. One hundredth Annual Report of the School Committee of Lowell together with the Sixty-second Annual Report of Superintendent of Schools, 1925.
2. Auditor's Ninetieth Annual Report of the Receipts and Expenditures of the City of Lowell, also General Information for the financial year ending Dec. 31, 1925.
3. Reports of Births, Marriages and Deaths, 1925.
4. Report of the Board of Health, 1925.
5. Annual Report of the Fire Department, 1925.
6. Park Commissioners' Twenty-third Annual Report, ending December 31, 1925.
7. Report of the Trustees of the City Library for 1925.
8. List of Jurors for the year 1926.
9. Annual Report of the Police Department, December 31, 1925.

FOURTH INAUGURAL MESSAGE

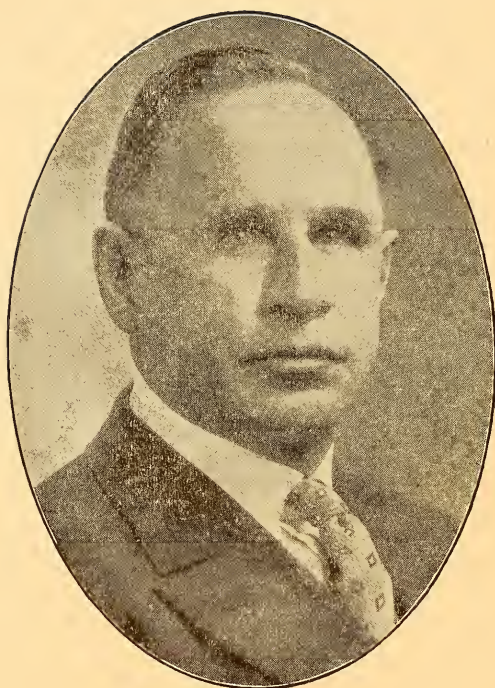

OF

JOHN J. DONOVAN, MAYOR

LOWELL, MASSACHUSETTS

JANUARY FOUR, NINETEEN HUNDRED TWENTY-SIX

JOHN J. DONOVAN

Mayor's Fourth Inaugural Message

GENTLEMEN OF THE CITY COUNCIL:—

Today I present my fourth inaugural address to the City Council. I welcome into official life the new members of the council, and ask that they accept my best wishes for a pleasant and successful service in office. Three years ago I too, entered upon an untried field of public service with the same sincere and honest purpose to try and render to my fellow citizens a clean and capable administration of public affairs. My first two years met with approval, and I was re-elected. The past year has been one of strife and confusion, which is inevitable when a civic reform movement is inaugurated in any community. Such movements should be primarily for the welfare of the city as a whole and not for the purpose of bringing before the bar of public opinion city officials to be ridiculed and lashed with unreasoning wrath and accusation.

I have hesitated to speak at this time of the present situation in our city. Yet, were I to ignore it the assumption would be that I was evasive and perhaps afraid to discuss frankly with the people of Lowell present conditions. For the past eight months it has been a one-sided affair. Every kind of suspicion and misrepresentation has been directed at your public officials. The good in public life has been spoken of in a whisper, if at all, while the alleged bad in public affairs is proclaimed and broadcast to the world. Perhaps it is now time to sober down a bit, and view things from the standpoint of justice and fair play. Conditions of public life in Lowell today are no worse than in past years, only they are made to appear so.

The average business man can conduct his business affairs on his own initiative and judgment. If he makes a mistake he is answerable to himself and the responsibility is his. The average public official does not know often times that he has violated some technical provision of the general laws, city charter, or ordinances, until a decision of the supreme court has been rendered, or he has been haled into court on a criminal charge. Yet, his motives and conduct can be as well intentioned as that of the business man with no greater element of wrong-doing involved.

A PERSONAL WORD.

Let me say to my fellow citizens that I do not fear the outcome of the charges pending against me. I ask for no sympathy in this present hour of general accusation, but I do ask and feel that I have a right to expect simple justice and fair mindedness from my fellow citizens. I ask that they form no definite opinion adversely to me upon the one-sided presentation of alleged error in my public conduct.

Perhaps I have not been the ablest and wisest administrator who has ever held the office of mayor. From the standpoint of brilliancy of speech and artfulness in official conduct that is true, but from the standpoint of going through office an honest man and uninfluenced by improper motives, I am the equal of any man who has held the office of mayor since this city was incorporated, and I am confident that a jury of my fellow men will say so.

Perhaps when all these troublesome clouds have passed away and citizens are permitted to view things in a calm and deliberate manner they may come to the conclusion that after all we have had "much smoke and little fire".

ble to levy taxable revenue. There is but little difference between municipal economics and individual economics; the law of averages works about the same in both instances.

EMERGENCY ORDERS.

We have heard much in the past eight months about the alleged abuse of emergency purchase of supplies. Our citizens have been led to believe that it is a favorite pastime at City Hall to declare these emergencies so as to avoid competitive bidding. It may be of interest to know that a total of over seven thousand requisitions have gone through the purchasing's office the past year. Yes, let me repeat, over seven thousand requisitions and of this number less than forty have been emergency requisitions and the majority of these emergency requisitions have been for hay, grain, coal and fire hose. Is this a terrible abuse of the emergency privilege?

LOWELL'S CENTENNIAL

One of the most important events in the history of Lowell is to be celebrated this year, namely: "The One Hundredth Anniversary of the Incorporation of Lowell as a Town". This celebration, which has already assumed great proportions must be a success and I now call upon all of our citizens to see that nothing be left undone to this end.

Committees are functioning and plans are being made rapidly for the Centennial observance. As time goes on these plans will develop and as the scope of their operation broaden our citizens will be called upon to take a greater and greater interest and activity in them. There is the greatest of harmony existing in the ranks of the Centennial Workers at the present time and I see no reason why this relationship should

not continue. We all must put aside our political and personal feelings and work towards a common end, and that end, the success of the Lowell Centennial in 1926.

MUNICIPAL GARAGE

I would recommend the appointment of a special committee of the City Council to consider the advisability of perfecting plans for the erection and maintenance of a municipal garage. The great increase in the number of motor vehicles for all departments and the expense of upkeep and repairs would seem to justify an exhaustive study of the proposition.

A NEW POLICE STATION.

I recommend that the City Council give serious consideration to the advisability of perfecting plans for an up-to-date Central Police Headquarters. There can be no denying the fact but what the present headquarters are out of date, are too cramped, have few, if any, of the modern police facilities, are dark and dingy and in no way do they come up to the requirements desired or expected of them. With the removal of the county court house to Hurd street this question is of immediate serious concern.

CHARITY DEPARTMENT.

Much contention has arisen during the past year in relation to the Charity Department affairs. Criticism and investigation have been directed at this department with much severity. A few hours of examination of this department with one's eye centered on re-action from the standpoint of newspaper publicity is not going to solve very substantially the problems of the department.

THE REAL TROUBLE WITH LOWELL

The administration of a city and state generally since the war and as a matter of fact, in the last 20 years, is no easy proposition. The government expenses have increased annually and appear to have increased faster than the value of property on which taxes are levied, and the result has been a great increase in the tax rate. Then there has been a great increase in the expenditures for the mental, cultural and hygienic development of the public, which of course is a very good thing, but that I think is one thing which should be somewhat governed by one's needs, and while of course we all desire things to be nice and useful, we can't always have them just the way we would like to have them. The tendency has also been for people to demand better quality and a greater quantity of public service, all which is very desirable but it should be kept within well defined bounds.

Year after year it is the same old complaint — taxes are high. Waste and extravagance dominate city expenditures; our city officials are incompetent. A hundred and one views are expressed about the public service. I venture to suggest after three years of service what to my mind is a most essential trouble. We demand every modern convenience of up-to-date city life. We insist that our streets be well-lighted and paved; that our schools lack not even the most modern frill of education; that our parks and playgrounds be equipped with modern recreational facilities; that our public health standards be of the best; that public buildings be maintained and new ones built as needed. Police and fire protection and service must be had. Yes, we demand all the comforts and conveniences of modern city life, and in addition pay our proportionate share of state and county expense. Some will say that there is too much waste and extravagance in public expenditures; that we would have lower taxes but for this.

I do not say that wasteful and extravagant methods are entirely eliminated in public affairs any more now since American government was founded, but I do say that there is needless expense imposed upon communities by general laws enacted by the state legislature, and which is outside the control of local government and that there is so much of fixed charges in a local budget which must be provided for, for one reason or another, but little is left for the element of waste and extravagance to come into play.

The City of Lowell can have a \$20 or a \$25 tax-rate this year if its citizens really want it. We can cut down our lighting bill one half and save close to \$100,000. We can do but little work on our streets and save a quarter of a million dollars. We can collect ashes and house offal twice a month instead of weekly and save \$50,000. We can pass up the maintenance of parks, playgrounds, health camps; close our hospitals and avoid our obligations of charity service. We can curtail our school program and save unlimited money. In fact in every department of the city we can save money. We can save a million dollars at the expense of modern city comfort and convenience. You gentlemen have responsibility in this matter.

Let us stop talking about waste and extravagance and high tax rates for a moment and reflect upon other lines. True, it will be a unique diversion but perhaps a healthy one. We demand modern municipal conveniences in every department of public service and fail to provide the necessary revenue through increased municipal growth in business and civic wealth. We complain about high tax rates which are inevitable when the municipal wealth of the community fails to keep pace with the demands of modern city life.

If our taxes are too high, it is fundamentally caused by a too rapid advance along lines of municipal luxury and comfort with not enough resources availa-

A division of the department became effective last year. The department is now divided into subdivisions of "Out-Door Relief and Mothers' Aid" and "Chelmsford Street Hospital". It is an arrangement which I believe will bring about a more efficient operation than before.

It would be a very good thing if our citizens would take enough time to visit the Chelmsford Street Hospital and see for themselves the magnitude of the work involved in the maintenance of this institution. It would be much more impressive than acceptance of criticism based upon no more intimate knowledge of conditions than is possessed by the average citizen. Municipal charity can not be governed altogether by any set of hard and fast rules.

HEALTH CAMP FOR CHILDREN.

This is a feature of municipal activity that should demand from the city government greater assistance than in the past. Upon my recommendation an appropriation of \$5,000 was allowed last year for the erection of suitable buildings. These buildings will be available for occupancy this year. The Board of Health should receive liberal appropriations this year to maintain a health camp for children on a much larger scale than in the past. Simply bringing children to the camp for a few hours a day is a small physical benefit. Equipment and appropriation should be sufficient to permit children to remain over night, if the camp is to be of real permanent service.

BOARD OF PUBLIC SERVICE.

Despite agitation directed against this board its program of street work has gone on with remarkable efficiency and dispatch. In fact when figures are available it will be proven that last year was the banner

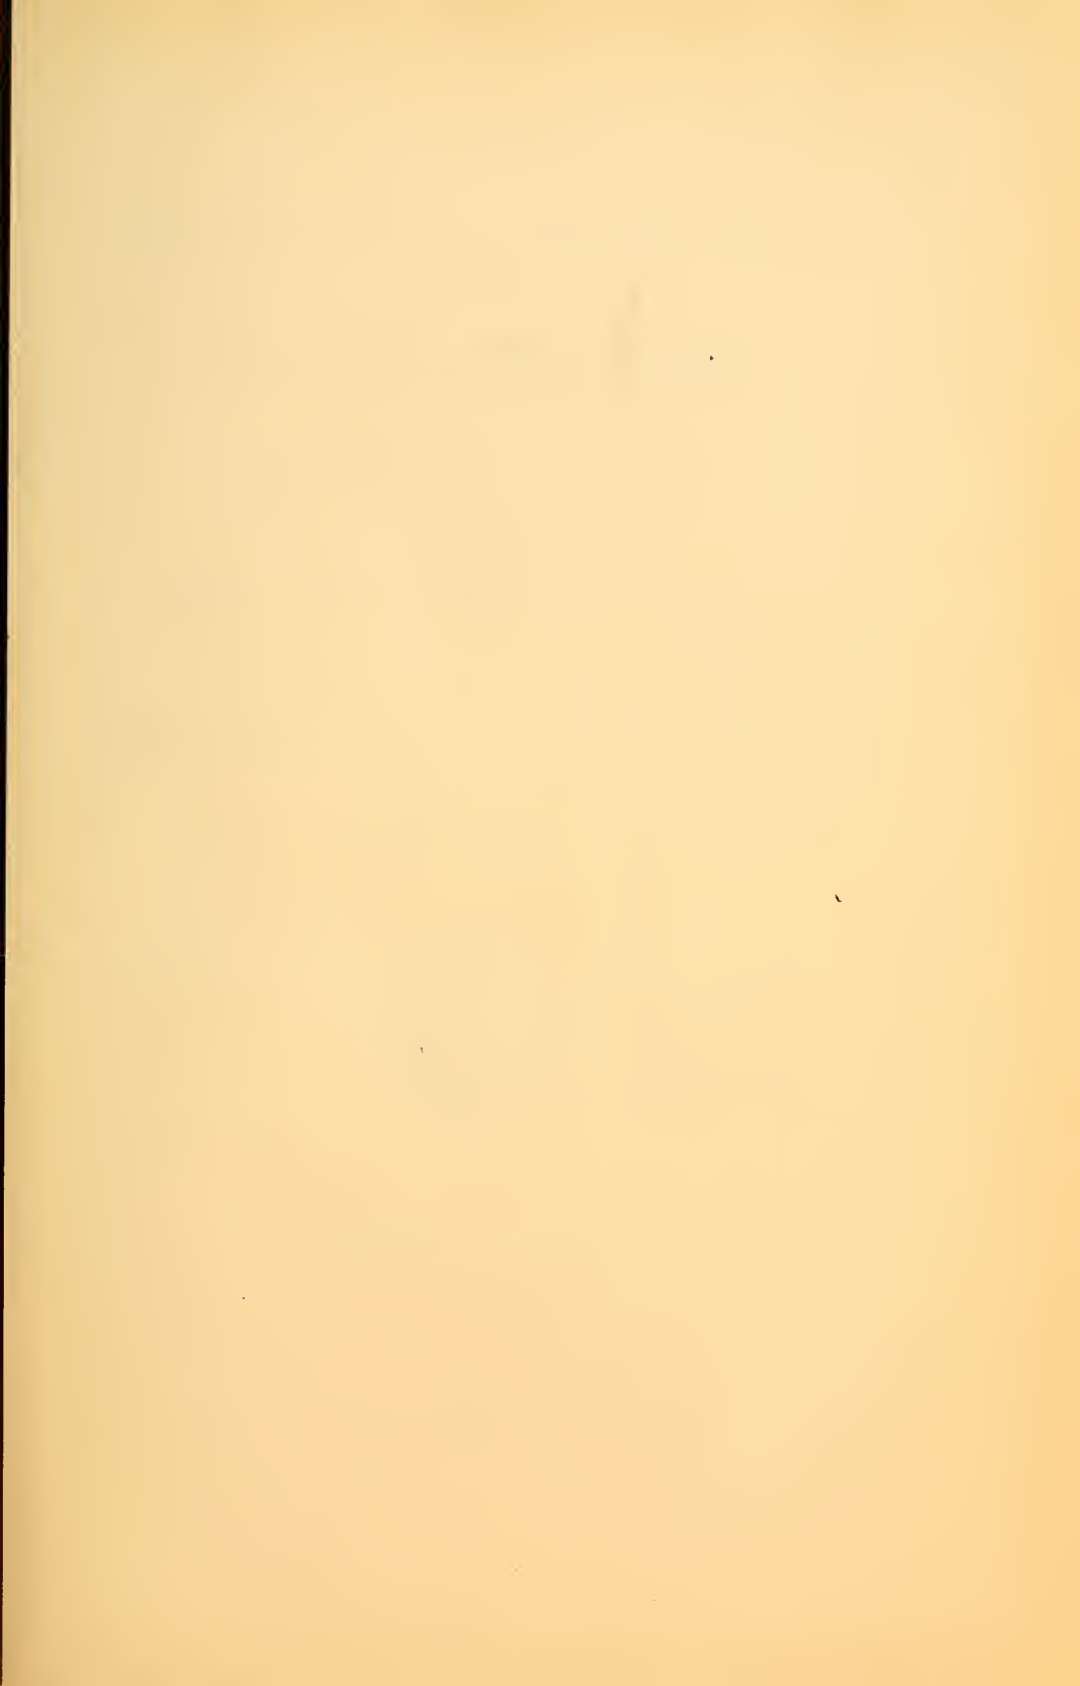

year in street work accomplishment. The Board completed its program of work laid out at the beginning of the year and kept within its appropriation. It must be evident to any citizens who wishes to view public work impartially that great strides have been made in street work under the Board of Public Service the past three years. I have confidence in the personnel of the board and stand ready to aid them in their constructive program of street work.

FINANCIAL COMMENT.

From out of the maze of confusion relating to our financial condition it will be found when the true balance of accounts is reached that our city has kept its expenditures within its income. Our tax-rate advanced last year and so did the tax rates of many other cities of the state. We borrowed less money last year than we paid on the city debt. We are in a sound and healthy financial condition and are far from being headed toward financial chaos as critics of the administration would make out to serve political ends.

CONCLUSION.

Let us approach the new year with confidence and courage in our work, and as our best judgment points out the way to do things, let them be done that way. We will not be immune from criticism and abuse; that would be too much to expect, but perhaps it may be a little fairer and just this year than the past year. In any event it is our obligation to go forward with firm resolve and purpose to give our city a creditable and decent administration of public affairs. This is my pledge to my fellow citizens, regardless of the efforts to discredit my public service.

One Hundredth Annual Report
OF THE
School Committee
OF THE
CITY OF LOWELL
AND THE
Sixty-second Annual Report
OF THE
Superintendent of Public Schools
1925

LOWELL, MASS.

BUCKLAND PTG. CO.
67 MIDDLE ST., LOWELL, MASS.

CITY OF LOWELL

Office of the School Committee,

Lowell, Mass., March 9, 1926.

At a meeting of the School Committee, held on this date, it was voted to adopt the report of the Superintendent of Schools for 1925 as the report of the School Committee for that year and to authorize the printing of the report.

In accordance with this vote the report is herewith submitted.

HUGH J. MOLLOY,

Secretary.

Tuition	13,464.24
Massachusetts School Fund	95,496.79
Americanization	6,836.89
Sight Saving Class	500.00

Total	204,009.61
Expenditures by Public Property Department	69,060.25

RECEIPTS AND EXPENDITURES

(Discussion)

The total amount expended in 1925 was \$1,443,491.91; the amount for the year 1924 was \$1,374,351.42. The increase for the year was \$69,140.49.

The large items of increase during the year are as follows: High School Salaries, \$13,410.75; Junior High and Grammar Salaries, \$22,333.15; Primary and Mixed School Salaries, \$6,605.41; Kindergarten Salaries, \$1,180.82; Janitors, \$3,312.32; Firemen, \$3,811.53; Vocational School Teachers and Janitors, \$4,951.69; Bills, \$11,322.95.

The per capita cost for tuition alone in 1924 and 1925 were as follows in the different grades of schools:

	1924	1925
High	\$87.68	\$85.85
Junior High	79.60	85.95
Grammar	56.87	56.54
Primary and Mixed	44.81	47.70
Kindergarten	72.41	69.12

The city received on account of the school department various sums listed on page 12; which total \$204,009.61; therefore the net expenditure by the School Committee for the year 1925 was \$1,239,482.30.

The item of reimbursement from the Massachusetts School Fund is made up from an allowance of \$200 for every teacher's salary which is not less than \$950, under conditions set forth in the law.

SCHOOL CENSUS

The following data were obtained from the census of 1925:—

	Males	Females	Total
(a) Five years of age or over and under seven	1736	1754	3490
(b) Seven years of age or over and under sixteen	6979	7603	14582
(c) Fourteen years of age or over and under sixteen.....	1580	2676	3656
	<hr/>	<hr/>	<hr/>
	10295	11433	21728

Certain passages from the statutes which apply to school attendance are here quoted for the information of the general public:

CHAPTER 76.

"SECTION 1. (As amended by chapter 463, Acts of 1921.) Every child between seven and fourteen, every child under sixteen who does not meet the requirements for the completion of the sixth grade of the public schools of the town where he resides, and every child under sixteen except a child holding an employment certificate as provided in chapter one hundred and forty-nine and employed in some regular employment or business for at least six hours per day, and except a child having the written permission of the superintendent of schools of the town where he resides to engage in profitable employment at home, shall, subject to section fifteen, attend a public day school in said town or some other day school approved by the school committee, during the entire time the public schools are in session, unless the child attends school in another town, during the entire time the same is in session, under sections six to twelve, inclusive, or under chapter seventy-one; but such attendance shall not be required of a child whose physical or mental condition is such as to render attendance inexpedient or impracticable, or who is being otherwise instructed in a manner approved in advance by the superintendent or the school committee. The superintendent, or teachers in so far as authorized by him or by the school committee, may excuse cases of necessary absence for other causes not exceeding seven day sessions or fourteen half day sessions in any period of six months. For the purposes of this section, school committees shall approve a private school only when the instruction in all the studies required by law is in English, and when satisfied that such instruction equals in thoroughness and efficiency, and in the progress made therein, that in the public schools in the same town; but they shall not withhold such approval on account of religious teaching.

The school committee of each town shall provide for and enforce the school attendance of all children actually residing therein in accordance herewith.

SECTION 2. Every person in control of a child described in the preceding section shall cause him to attend school as therein required, and, if he fails so to do for seven day sessions or fourteen half day sessions within any period of six months, he shall, on complaint by an attendance officer, be punished by a fine of not more than twenty dollars. No physical or mental condition capable of correction, or rendering the child a fit subject for special instruction at public charge in institutions other than public day schools, shall avail as a defence unless it appears that the defendant has employed all reasonable measures for correction of the condition and the suitable instruction of the child.

SECTION 3. Every illiterate minor between sixteen and twenty-one except a married woman, shall attend some public evening school, if any, in the town of his residence, for the whole time during which the public evening schools are in session, unless he attends a public day school, or a private school approved as provided in section one by the school committee, or unless his physical or mental condition is such as to render his attendance harmful or impracticable. Wilful violation of this section by such a minor shall be punished by a fine of not less than five dollars; failure for six sessions within a period of one month by any person in control of such a minor to cause his attendance, shall, on complaint by an attendance officer, be punished by a fine of not more than twenty dollars.

SECTION 4. Whoever induces or attempts to induce a minor to absent himself unlawfully from school, or unlawfully employs him or harbors a minor who, while school is in session, is absent unlawfully therefrom, shall be punished by a fine of not more than fifty dollars."

Although the age limits for compulsory school attendance in Massachusetts are 7 and 14 years most towns and cities admit children to kindergarten and primary schools at lesser ages than the one specified in the statutes. In Lowell a child may enter the kindergarten school at the age of 4 years and 3 months; a child may enter the first primary grade at 5 years and 6 months, with this exception, however, that a child who has attended kindergarten school for one year may be accepted in the first primary grade at 5 years and 3 months.

These ages are certainly low enough and reasonable enough and parents should not persistently strive to have exceptions to the rules made for their children.

SCHOOL HOUSES

Early in the year the School Committee voted to employ Professor L. O. Cummings of the Harvard School of Education to make a survey of school housing conditions with a view to recommending some plan for the steady and gradual development and improvement of school accommodations.

The high school has not as yet been used to its full capacity, but it is to be remembered that the retention in the Junior High organizations of many who, under the old arrangement of grades, would be members of the high school freshman class has virtually enlarged the capacity of the high school.

The larger school centres, such as the Butler, Morey, Bartlett and Varnum, could make good use of somewhat larger accommodations as certain school activities are hardly up to modern standards.

We should have, also, in several sections, rooms which might be used for special classes and for various forms of work which would meet the needs of many children better than ordinary classes meet them.

No thoughtful person would, at the present time, recommend much in the way of enlargement but, nevertheless, a reasonably steady improvement and development of housing conditions would seem to be consistent with prudence and good judgment.

Total.....	7153	7000	14153

HIGH SCHOOL

The High School graduated a class of 565 in June and there was an entering class of 802 in the September previous. Of this class 470 were from the public schools, 237 from private schools, 71 from towns which have certificate privileges, 5 entered by examination and 19 came from out-of-town schools. Of the class of 802, 305 entered with advanced standing.

Ninety-five percent of those certified by the grammar schools actually entered the High School; the average age of the entering class was 15 years.

The graduating exercises were held in the Memorial Auditorium on June 24; the names of the Carney Medal students and the names of the students who were awarded honorable mention are here given:

CARNEY MEDAL STUDENTS

Eunice Cook	Gordon Ryerson Williams
Elizabeth Forrest Lambert	Artemas James Stewart
Mary Agnes Brown	Elmore Don Lundgren

AMERICAN HISTORY MEDAL

Elizabeth Doris Carey

MEDICAL AND DENTAL SUPERVISION

DIRECTOR OF SCHOOL HYGIENE—Francis A. Finnegan, M. D.

Nurse, Miss Dwyer—High School, Continuation School and Vocational School for Girls—Drs. E. Y. Slaughter and F. A. Finnegan.

Nurse, Miss Craig—Washington, Morey, Pine Street, Colburn Grammar and Primary Schools—Drs. E. O. Tabor and C. M. Roughan.

Nurse, Miss O'Dwyer—Varnum, West Sixth Street, Tenth Street, Lakeview Avenue, Moody, Pond Street, High Street, Sycamore Street and Greenhalge Schools—Drs. G. O. Lavallee and C. M. Roughan.

Nurse, Miss Lettrell—Eliot, Lincoln, Laura E. Lee, Powell Street, Howard Street, Grand Street, Edson, Central Street, Butler, Lyon Street, Carter Street, Weed Street, London Street, West London Street, Ames Street and Charles Street—Drs. J. F. Boyle and W. E. Devine.

Nurse, Miss Frazier—Bartlett, Pawtucket, Lexington Avenue, Middlesex Village Schools—Dr. C. S. Baker.

Nurse, Miss Fox—Green, Cabot Street, Cross Street, Dover Street, Kirk Street, Worthen Street and Morrill Schools—Drs. J. J. Cassidy and E. M. Slaughter.

Nurse, Miss Fitzpatrick—Greek Orthodox, St. Michael's, St. Patrick's Boys' and Girls' and Boys' Vocational—Drs. H. B. Plunkett and C. M. Roughan.

Nurse, Miss Leclair—St. Joseph's Boys' and Girls' and Ste. Jeanne d'Arc—Dr. R. Mignault.

Nurse, Miss Douglass—Immaculate Conception, St. Peter's and Sacred Heart—Dr. F. P. Murphy.

Nurse, Miss Morrier—St. Louis', St. Marie's and Riverside—Drs. C. M. Roughan and R. Mignault.

The dental clinic is in the Worthen Street School, located on Worthen Street between Market and Broadway. The room is open on all school days, including days when the storm signal is sounded, from nine until twelve in the forenoon, and service is free for any child from any school, public or private, for whom an appointment has been made: appointments are made by school physicians, nurses, teachers and Miss Lantagne, the dentist's assistant.

	<hr/> \$7,293.39	<hr/> \$6,621.78

VOCATIONAL SCHOOL

The fifteenth year of the school opened with an enrollment of two hundred and seventy-two boys and one hundred and thirty-eight girls. The only requirement for admission to the day classes of the Vocational School as far as age is concerned is that a pupil must be not less than fourteen and not more than twenty-five years of age.

All pupils must be residents of the state; for pupils who do not reside in Lowell there is a tuition charge of \$225.00 for boys and \$195.00 for girls, payable by the city or town of the non-resident pupil, regardless of his place of residence.

The work is so arranged that a boy may enter at any time and advance as rapidly as his industry and ability will allow.

The school offers preliminary training for boys as carpenters, electricians, cabinet-makers, machinists, and automobile repairers.

The boys are trained mostly on productive work in all departments and the work is of such a practical nature that they fit naturally into the industry in advanced apprenticeship standing.

All the courses are planned for three years, seven hours a day, five days a week.

The courses are divided into three phases consisting of about one year's work in each. Upon the satisfactory completion of any phase a certificate is given.

If a boy gets three certificates and works at the trade for which the school has trained him, he is entitled to a diploma. A satisfactory fourth year in school also entitles him to a diploma.

The courses have been run on a weekly schedule as follows: Shop Science, one-half day; Academics, one day; Mechanical Drawing, one-half day; Physical Exercises, two hours, the time taken as far as possible from the time allotted to related work; the remaining two and one-half days are spent on practical work in the shops.

As the school was filled to capacity the use of two additional rooms at the Worthen Street school had to be continued.

The equipment is as follows:

Machine Shop:—

5 milling machines, 1 universal, 3 shapers, 3 drills, 2 planers, 2 power saws, 1 grinder, 25 engine lathes, 2 speed lathes, and other small tools and accessories.

Electrical Shop:—

7 direct current motors, from 1 to 10 HP, 4-3 phase generators, 2 motor generators sets, 1 rotary converter, 9 to 3½, 1 Tungar Rectifier, 1 metal shear, 1 winding head, 3-2 KW. transformers, measuring instruments and small tools.

Carpentry and Cabinet-Making Shop:—

1 buzz planer, 1 cylinder planer, 1 combination and 1 single saw bench, 1 band saw, 1 turning lathe, 26 sets of carpenter tools, benches and auxiliary tools for carpenters and sets of hand tools for the cabinet makers.

Automobile Department:—

1 Oakland, 1 Ford car (rebuilt), 1 Maxwell car, 1 Studebaker run-about, 1 Lenox touring car, 1 Moon chassis, 1 Essex touring car, 1 N. E. Motor generator, 5 auto engines for instruction purposes, 3 starting and lighting systems, Ford-Delco, North Easterns, 1 N. E. Dynamotor, 2 battery chargers, 1 battery steamer, wrenches. pliers,

jacks, etc., for general repairs, 1 storage voltmeter, 1 electric testing instrument.

GIRLS' DEPARTMENT

High School Annex, Paige and John Streets

(Free to all girls living in Massachusetts)

The school aims to prepare the girls of Lowell and surrounding towns for life's activities and duties; to give them a training in the branches of knowledge and the trades that are most useful in the home and gaining a livelihood.

It is recognized that every girl preparing through any kind of an education for life will have more or less to do with a home, with the chances largely in favor of her having at some time the entire care of a home; and upon the proper management of the home depends much of the happiness and success of our community. Hence a training in home economy should be part of every girl's education.

To meet these requirements the Vocational School offers two-year courses in housekeeping, dressmaking and power machine work. In addition the school teaches academic subjects which are related to the practical work in a way that makes their value fully appreciated. Millinery is taken up in season during the second year.

Physical exercises, under direction, is an attraction of the junior and senior years.

Dressmaking—This course is planned to fit a girl for the dressmaking trade. It includes plain sewing, dressmaking, power machine work and mending.

Mending:

Patching.

Darning.

Mending of straight and hedge tears.

Millinery:

- Fall and Spring Renovating.
- Making of velvet, straw and lace hats.
- Trimming.
- Flower Making.

Housekeeping—The housekeeping course includes everything that makes and keeps a house in good condition to live in. It teaches the buyer to get one hundred cents' worth out of every dollar spent for food and clothes. It includes cooking, household management, laundry work, table service, marketing and home nursing.

Cooking:

- Economy and management of the kitchen.
- Plain cooking.
- Food values.
- Simple menus.
- Serving.
- Marketing.
- Practical application in the home.

Note:—Repetition develops responsibility and assurance in the cooking and serving of meals. This practical experience is gained in the lunch room of the State Normal School, now under the management of the Vocational School.

Laundry Courses—Includes practice in removal of stains, washing and ironing all articles of clothing and of household linens.

Household Engineering:

- Efficient Household Arrangement.
- Plans and methods for Daily Housework.
- Choice and care of Household Tools.

Home Nursing:

- Care of a bedroom.
- Care of a patient.
- Bandaging.
- First Aids.
- Care of the Baby.

Arithmetic in Relation to:

- Dressmaking.
- Personal expenditure.
- Household.
- Business.

English:

- Correction and improvement of every-day speech.
- Personal and business correspondence.
- Cultivation of a taste for reading.

Civics:

- Government of Communities.
- Current events.
- Local interests.
- Club conduct.

Household Science:

- The Physics and Chemistry of the Household.

Textiles:

- Study of the Fabrics.
 - Name.
 - Cost.
 - Durability.
 - Uses.
 - Tests.

Design:

- Art as applied to a woman's clothing.
 - Color.
 - Line.
 - Fabric.
 - Appropriateness.

Care of the Home:

- Furnishing.
- Decorating.
- Sanitation.

GIRLS' LUNCH DEPARTMENT

In February, 1916, the girls' school opened the dining room at the State Normal School and since then has served dinners and luncheons to the faculty and students of the school. This gives a valuable training in preparing food in large quantities and also in serving; the practice proved to be so valuable it seemed wise to make it a permanent part of the curriculum.

The school sent out a class of 34 graduates on June 23, 1925.

Home project work is a feature of the Vocational School programme. By assignment the girls carry out at home many projects as a result of the instruction received in school. Much of the home project work is supervised. In this way the school assures itself that its instruction is functioning. Both the school and home have found the teachers' visits helpful.

The State Board of Education exercises a considerable control over the school, as the state agreed to pay one-half of the maintenance expense of the school. In order to secure reimbursement from the state, the course of study, equipment, buildings and the work of the teachers must be approved by the agents of the State Board of Education.

EVENING VOCATIONAL SCHOOL FOR MEN

These courses are trade extension and are open only to men employed in that line of work during the day and who are sixteen years of age or over.

The school opens early in October and each class meets two evenings a week, two hours an evening, for twenty weeks.

The following courses were offered:

Course	No. Belonging
Machinist	48
Auto Repair	61
Cabinet-Making	18
Carpentry and Steel Sq.	43
Plumbing	46
Electrical Theory	28
Firemen and Engineers	50
Blue Print Reading	0
Sheet Metal Drafting	14

Definite courses have been laid out and a system of records devised so that each man's progress and accomplishment can be kept.

Certificates are given to those whose attendance and ranks are satisfactory. On the certificates are the number of evenings attended and the kind of instruction completed.

EVENING PRACTICAL ARTS CLASSES FOR WOMEN

The occupations of the household in which evening instruction has been offered are cooking, dressmaking, millinery, embroidery, home nursing and child welfare.

All types of women have taken advantage of these classes. The enrollment includes the busy housewife and mother, the young married woman lacking practical home experience, the engaged girl, the business woman and the non-English speaking woman.

The work is conducted on the plan of the short unit course. A short unit course is a series of lessons on one phase of a particular subject—quick breads in cooking; velvet hats in millinery; sport skirts in dressmaking, etc. In general the succession of units follows the progressive plan. Class members pass from unit to unit in a continuous series or drop out at the end of a unit, their places being taken by other pupils. This is possible because each unit course is an entity—each process step is covered by itself without regard to what comes before or after as in a consecutive course of study.

The true aim of practical art classes for women should be realized perhaps most fully in teaching cooking. The subject is taught in such a way as to give actual ability to cook under home conditions.

Unit Courses in First Year Cookery for Year 1924-1925:—

Breads and Fruits—six lessons; Pastry and Scalloped Dishes—five lessons; Cake and Vegetables—five lessons; Chafing Dish Suppers—four lessons; Breakfasts—four lessons; Suppers—ten lessons; Invalid Cookery—four lessons; Dinners—seven lessons.

At the request of a group of housekeepers an afternoon class in cookery was opened. This class operated one afternoon a week for a three and one-half hour session.

Unit Courses in Second Year Cookery for Year 1924-1925:—

Sunday Night Suppers—ten lessons; Tea accompaniments and Thanksgiving Dinner—five lessons; Bread and Desserts and Christmas Lunch—five lessons; Company Meals—nine lessons; Picnic Lunches—five lessons; Sunday Dinners and Menus for Special Occasions—fifteen lessons.

Unit Courses in First Year Dressmaking for Year 1924-1925:—

Simple Dress—twelve lessons; Costume Slip—eight lessons Over-blouse—ten lessons; Muslin or Crepe Dress—fourteen lessons.

Unit Courses in Second Year Dressmaking for Year 1924-1925:—

Remodeling—sixteen lessons; Jersey or Flannel Dress—fifteen lessons; Silk Dress—sixteen lessons.

Unit Courses in Millinery for Year 1924-1925:—

Fall Hat—eight lessons; Velvet Hat—ten lessons; Between-seasons Hat—eight lessons; Straw Braid Hat—eight lessons; Horse-hair Hat—ten lessons.

Unit Courses in Embroidery for Year 1924-1925:—

Embroidery stitches—twelve lessons; Christmas Novelties—seven lessons; Colored Embroidery—twelve lessons; Italian Punch Work—eleven lessons.

Course in Home Nursing:—

The Red Cross Standard Course (16 two hour sessions) is given and the Red Cross Certificate is awarded at the successful completion of the course.

The graduate nurses in charge of home nursing have been preparing to teach First Aid classes. The school expects to offer courses in first aid during 1925-1926.

The woman who has completed the work of a practical art class should be able to continue her work independently. The purpose of the work is defeated if the aim is merely production.

A record of the accomplishment of each pupil is kept on unit history cards.

For the year 1924-1925 the number of women enrolled in the Evening Practical Arts classes was 1952, distributed as follows:—Cooking, 617; Dressmaking, 655; Millinery, 496; Embroidery, 48; Home Nursing, 136.

Fifty-four non-residents attended these classes and Lowell received tuition from several of the surrounding towns for their attendance.

Classes were in session for twenty-five weeks and the percent of attendance was 91.

Sixty teachers were engaged in the work of conducting these classes.

The main centre was the High School Annex, but classes were also carried on at the Butler, Colburn, Edson, Franklin, Green, Greenhalge, Lincoln, Moody, Pawtucket, Riverside, Varnum and Washington Schools and at the Girls' City Club.

At the Green School, where Americanization classes were conducted with Greek and French girls, a special arrangement was made whereby these girls attended academic classes two evenings a week and the vocational classes in dressmaking and cooking one evening. The contents of the vocational courses was adopted to the needs of the girls.

All instructors of vocational subjects are tradeswomen who were prepared for teaching by a course in teacher-training conducted under the direction of the Massachusetts Department of Education.

All teachers in service are required to do some approved professional improvement work each year. To meet the requirement for 1924-25 the instructors of cookery enrolled in a course in Household Management under Mrs. Elizabeth MacDonald, Head of the department of Household Arts of the college of Practical Arts, Boston University. Miss Lillian Phillips of the Boston Normal Art School conducted a course in Costume Design with the dressmaking and millinery groups.

These Professional Improvement classes operated during May and June at the Girls' Vocational School at the High School Annex.

REPORT OF THE SUPERVISOR OF PRIMARY GRADES, KINDERGARTENS AND SCHOOL GARDENS.

To Mr. Hugh J. Molloy,
Superintendent of Schools.

There have been few overcrowded primary schools during the past year.

This was made possible by the erection of a portable, building to relieve the Tenth Street school, the opening of another room in the Kirk Street school, and the transferring of pupils.

I have always advocated small numbers in the primary grades, more especially in the first grade.

The laws of nature make the years spent in these grades the more formative, the amount of mental growth greater, than in succeeding years.

It is the time to inculcate good habits, to lay the foundation of character, to implant high ideals.

Unless the teacher realizes the importance of these things in the future life of the child, she falls far short of her responsibilities as a teacher.

The teacher cannot accomplish all this and also complete the work of her grade in the fundamental subjects required in the school curriculum, if she has large numbers.

With the cooperation which exists between the teachers of the kindergarten and primary grades splendid results are being obtained.

The educational principles of the kindergarten and elementary schools should be identical.

Reading

More emphasis is now being placed on silent reading. Many of the latest books are devoted entirely to silent reading, even those for the first grades.

The grade teacher knows that the child must be taught the meaning and sound of certain symbols and how to combine these symbols into phonetic elements and words. The ability of the child to recognize words independently and later, phrases and sentences, and to give expression to these, must precede silent reading.

Silent reading is a process by which the child learns to interpret the printed page to himself, while oral reading is a process in which he interprets it to others.

In the early grades where recognition of words and phrases is slow, where correct pronunciation and enunciation are important, oral reading is of first importance.

When many basal words and phrases have been mastered, silent reading should precede oral reading in order that the child may interpret simple passages to himself, before giving oral expression to them.

Drill in the primary grades in these lines helps the child in rapid silent reading when he has to interpret for himself the history, geography and literature of the upper grade textbooks.

Much of this work has been done in the past by our best primary teachers. The new books which have been placed on our approval list of reading books should prove very helpful in future work.

GARDEN WORK

In the death of our Congressman, John Jacob Rogers, the school garden children of Lowell lost their best friend and school garden work its most loyal champion and promoter.

An abundant supply of government seeds were sent every year by Mr. Rogers, to aid the boys and girls in their garden work.

The letters which were received from him, served to inspire and encourage our young people in their work.

In the 1925 school garden club, every child received at least one package of seeds from a supply sent by Mr. Rogers the previous year, the last seeds to be obtained from government appropriation, the last seeds sent from him.

It was a tribute to their good friend that these seeds, received after his death, should be so appreciated and so tenderly planted in home and school gardens.

The school children of Lowell will long remember John Jacob Rogers.

Respectfully submitted,

ALICE T. LEE.

REPORT OF PHYSICAL EDUCATION DEPARTMENT

The extra curriculum atheltic activities of the year have been about the same as those previously established.

Basketball league was won by the Bartlett School. Track competition produced the Varnum and Morey Schools as champions in the Junior and Senior divisions respectively.

A new cup presented by the K. of C for total points won was accepted. This presentation bespeaks the interest of this fraternal body in amateur athletics and clean sportsmanship. This cup is to be the permanent possession of the team winning it three times and is known as the K. of C. Trophy. The first leg in the cup was won by the Morey School.

In March of 1925, the Junior High School Relay teams were entered in the City Championship Track Meet and the A. G. Pollard trophy was won by the Butler School.

The baseball season opened at the begining of the spring term and the league championship was won by the Bartlett School.

Boys' Week parade was held in May and the school boys participated under direction of instructors. The track meet was also in charge of this department.

Marble contest sponsored by the Courier-Citizen was conducted by the instructors.

Field Hockey for girls was given a trial and proved that girls are very much interested in this sport, but we are handicapped by the lack of suitable playgrounds space near a school. School playgrounds such as that adjoining the Lincoln School are ideal and give opportunity for the mass to play with proper supervision.

The High School Freshman had a Football Team which played a schedule of three games which gave the boys an opportunity for competition and for learning the fundamentals of this game.

In reports of previous years mention has been made of the unsatisfactory conditions under which we are trying to carry on a progressive program of physical education. The conduction of exercises and games between desks in the school rooms is a great handicap. The use of assembly halls has never been encouraged because of their being on the third floor of a building or for the reason that damage might be done to walls hangings, lights, etc. The use of these halls would give a decided aid to the making of a bigger, better

program.

The Varnum School is the most handicapped school of all. There are two portable buildings in the yard which cut down play space. Physical classes conducted in the yard are restricted because of the disrupting effect that play noise has upon the remainder of the school. The yard itself is very dangerous because of the surface conditions. The rocks and stones have as much effect in limiting the physical work as has the lack of space.

The assembly hall of this school is large enough but wall hangings are endangered. However this could be overcome by the use of hanging nets. The lights could be placed against the ceiling and caged thereby eliminating the possibility of breaking them.

The Butler School uses a hall in the Carter St. School. This hall is an excellent place in which to conduct classes, except that in cold weather there is no way of heating it. The result is that temperature at times is as low as 45 degrees to 50 degrees. Besides being cold it is damp, making an unhealthy place for classes during winter weather. If heat could be gotten to this room and lights put in, the facilities for the indoor program of this school would be very favorable. This school has an adjoining lot which is used and makes an acceptable playground, but here also the school yard has not the proper surfacing for games.

The Morey School has a large playground but here again the surface is poor. Rocks of all sizes hinder the play. A room about sixty feet by forty feet with six pillars and a stage is the gymnasium. Here two classes are conducted at the same time. One class is of boys and the other of girls. This situation makes it very difficult for instructors to handle the classes and also tends to distract the pupils' attention from their own subjects. A curtain to divide this room in two and the removal of the stage would assist naturally in remedying conditions here.

There are two rooms off this hall which were originally intended for shower rooms. It would prove valuable if these showers were put in. This could be done perhaps at a small cost if individual shower heads were not used. An opportunity for showers should be provided not only here but in the other Junior High Schools.

The Bartlett School pupils fare better than the others in some ways; they have a small gymnasium. There is a space

in the basement (off the basement corridor) about 18x18 feet, which is utilized by the girls and occasionally by the boys as a class room. This room is too small and its situation is far from ideal for a class of any sort.

There is a great deal of land in the rear of this school which should be developed as a playground. At present the school makes use of it for baseball practice but development for use for other sports would certainly be of benefit.

The Moody School has very little space for play and exercise in its yard and physical education in the hall of this building also entails breakages which, however, could be lessened by hanging nets.

To sum up, the use of all our halls is desired. These halls should be protected by hanging nets, and the lights protected by being placed against the ceiling and encaged. Playgrounds should be surfaced so as to minimize danger and add more incentive to the spirit of pupils' play.

Respectively submitted,

DONALD R. MacINTYRE.

ATHLETICS IN THE HIGH SCHOOL.

To Mr. Hugh J. Molloy,
Superintendent of Schools.

Athletics have only of recent date been a source of concern to educators. A generation ago such an activity, as a legitimate part of school life, hardly existed. As years passed on and adolescents insisted on having their fun through recreative games and interschool contests, the school administrator has gradually been compelled to take an interest in guiding these activities. With the necessity for control has also come the realization that there are important educative values in athletics and that these ought to be extended to as many boys, and even girls, as possible. The more general the participation, the school man believes, the greater the spread of education and the more opportunity offered for the building of ideals and refining character.

Such a conception of the function of athletics is not widely held by the public at large. Here the one goal is the development of strong winning teams which will advertize the city and reflect glory on the school. Of course it is not

to be implied that the school man does not wish to win in the interschool contest. He expects his share of victories; he also desires to provide wholesome recreation and opportunity for character building for the great mass of students who may rightfully expect, in addition to their academic education, a certain amount of physical education. Many of the private schools have for some time recognized the value of this general athletic program and have been able to furnish the facilities for its realization.

Another aspect of the question of high school athletics arises as a result of the need of an organization within the school to manage and control this new enterprise. Formerly the managing of athletic teams was done by students. This was to be expected when the players bought their own equipment, when the games were played in open fields, and when little financial responsibility was involved. Today with high school stadia and playing fields costing thousands of dollars, with extensive arrangements necessary for important games, with the distribution of tickets on the same plan as employed by the colleges, with equipment to be purchased and cared for, the management and administration of athletics have assumed an unusual importance. With the public demand and enthusiasm on the increase, the problems of control become increasingly complex for an educational institution to handle.

A third question that might well be discussed is the method to be used in the future of financing athletics. If athletics are of educational value, why should not they be financed in the same way that other educational activities are financed? Supplies, books, and equipment pertaining to the academic life of the school are bought out of the school appropriation. Why not finance athletics in the same way? The profits of the games would under such a plan return to the city treasury where they would be available for ordinary school expenses. Might they not also be well used to provide scholarships for deserving boys?

The athletic situation in high schools is fraught with important educational problems and the school man must do some hard and fearless thinking if he is to attempt their solution.

Respectfully submitted ,

JAMES F. CONWAY.

Mr. Hugh J. Molloy,
Superintendent of Schools,
Lowell, Mass.

Dear Sir:

The following is my report as Director of Fire and Accident Prevention for the year 1925.

During the year I have given much attention to the Grammar and Primary schools as I felt that the younger children should receive more attention in the matter of safety than the older ones; at the same time I have not overlooked the High, Junior High, Vocational and Continuation schools. The safety of the children who attend the Kirk Street primary school has been one of the problems of the year.

Fire drills on the whole are uniform and very satisfactory. Safety rather than speed has been the watchword for all fire drills. I have given much time to the instruction of teachers and pupils in all the details of conducting these drills and of marching the children away safely from the fire zone.

Exposed belts and pulleys, jig saws and planers in the schools where they are used have been safeguarded. The disposal of waste matter in the schools has been attended to but such disposal could be improved in the larger schools by the installation of metal boxes with suitable covers and locks. Overhanging icicles, snow on the roofs, ice forming in the valleys on the roofs, icy steps and sidewalks adjacent to school buildings have been watched and cared for. The placing of snow guards on some of the very steep roofs and the repairing of broken gutters would help in the matter of safety.

Much good has been accomplished by providing white lines at many schools where there is considerable traffic. I should like to recommend at this time that the parking of automobiles in front of schools during school hours be prohibited.

Walking on the railroad tracks to and from school has been forbidden and occurs very rarely now.

I have given much time and effort, even outside school hours, to caution children against venturing on thin ice, going into deep water unless they are able to swim, coasting on the highways, to paying proper attention to railroad crossings and gates, playing games in the streets, riding bicycles on the sidewalks, riding on the handle bars of bicycles, riding

bicycles carelessly in the streets, riding on the rear of moving vehicles and demanding rides from the drivers of vehicles of any kind; I have also warned children against touching any kind of electric wiring, cut-out boxes, or fuse plugs. In attending to these things I have visited school assemblies and class rooms and spoken of the great dangers in using the public streets as playgrounds, have also explained the meaning of the white and yellow lines in the streets, the meaning of the different lights on traffic beacons, and the signals used by the traffic officers of the city.

In all the schools the matter of personal safety has been stressed steadily by the use of pictures and stories of accidents and I have had the full co-operation of all teachers in this work, such co-operation being after all the most important factor.

Much personal attention has been given at the schools at the time of school assembly and at the time of dismissal. boys have been instructed as directors of traffic at their schools and have been directed to report the registration numbers of drivers of automobiles and trucks who drive through lines of school children.

Liquid fire extinguishers have been kept in good condition; a few more might be distributed to good advantage.

Attics and cellars are free from combustible material and have no exposed live wires; all exit doors are kept free from refuse, as are the stairways and places beneath them. All locking devices on exit doors are in fairly good condition, stage curtains are in good condition and the permanent stage curtains are non-inflammable; most fire escapes are in good condition. Electric wiring and fuse boxes have been regularly inspected. I should like to see all picket fences capped by rails and exit signs near or over doors kept in good condition. In a word, very close attention has been given to anything and everything which might possibly be an element of danger in the schools or on the school premises.

Respectfully submitted,

WALTER R. JEYES,
Director of Fire and Accident Prevention.

CONTINUATION SCHOOL

The Lowell Continuation School was established in accordance with the state law in September, 1920.

Experience in administrating Continuation Schools has furnished considerable material wherewith to test the theories applied in the establishment of the school.

The functions this school has intended to perform for the group of minors designated by the law are:—(1) to give a so-called general improvement education; (2) To furnish through shop experiences and class-room exercises, pre-vocational training, which is, in effect, vocational guidance; and (3) To give some definite training for industry.

General improvement instruction for pupils in our school has had important effects. Instruction in civics, personal hygiene, regular school subjects, and opportunities for recreation have been provided in a less formal way than in the regular school. Shop work and subjects related to shop work have furnished much valuable experience in fields closely related to vocations.

The Continuation School has had a good influence on the attendance of children in the regular schools and on the tendency of those out of employment to return to school. Formerly, many children between 14 and 16 were neither in school nor at work. Some of them were hunting jobs, but the majority were adrift on the streets or idle at home.

The original plan for the Continuation School emphasized follow-up work at the home and the places of employment of the pupils. Our experience has justified this policy. The time for follow-up work is when the need is apparent, and so the teachers of the Continuation School may be found making visits at the homes of their pupils in the evening or on Saturday or Sunday.

By co-operation of home and employer, secured by follow-up work, the pupil comes to realize that regularity and punctuality are essential to success. The great majority of employers favor Continuation School in Lowell. The attitude of the employer is largely determined by the supply of and demand for juvenile labor. During a period of depression in business employers are often able to secure minors over 16 years of age to do work ordinarily performed by boys and girls of 14 to 16 years.

The Continuation School in Lowell, when established, had

an enrollment of approximately 1100 employed minors between the ages of 14 and 16. Since that time, due to business depression, the numbers have varied between 600 and 900 pupils.

The genuine interest of the employer in the employee is shown by the frequent request for information regarding the attendance of the latter in the school. A number of employers have stated that the school has assisted their employees. Many are of the opinion that there is less shifting of jobs when pupils attend Continuation School. So far as possible the hours of attendance at the school are those most convenient to the employer.

The size of the class groups gives a good chance for individual work in the classes. Pupils come to a teacher for two hours work and then go to another teacher for another two hours.

Typical Program for a four-hour period pupil:—

1st hours—Shop mathematics, hygiene and safety.

2nd hour—English, spelling and civics.

3rd hour—Shop.

4th hour—Shop.

For the 20-hour pupil or those who are temporarily out of employment a more varied program is furnished.

The problem of securing properly trained teachers for the Continuation School is a serious one. For this reason, the teaching force employed in this department of school work should remain intact, although the number of pupils attending this school varies from time to time.

The present minimum period of four hours per week is in some particulars a difficult period for business to adjust itself to, and this length of time is inadequately either to meet the legitimate demands of business or to adequately train the pupils who come to our school, so it has been recommended, and we strongly agree that the amount of time be extended to half time for a period of not less than 24 hours in every period of two weeks or an equivalent of such time and that the schools be continuously in session throughout the year.

THOMAS A. GINTY, Director.

JUNIOR HIGH SCHOOLS

The Junior High organization is now city wide and curriculum adjustments are practically complete. The system undoubtedly has some faults, but it has shown many advantages, especially to the great mass of pupils that make up the non-collegiate group. There is now very little shrinkage in numbers between eighth and ninth grades, in some cases as low as 2% to compare with the old figures of 25%. This means that about the entire pupil body that survives as far as the eighth grade also goes into the first year of High School work.

Also, they go into this first year of High School with more adequate knowledge of their purposes and abilities, because these are explained and tried out in the seventh and eighth grades, and there is a chance for a change of studies, as the interests and abilities of boys and girls show up in the two previous grades. The arrangement is a vast improvement over the former conditions of a sudden change of studies, methods, and school at the close of the Grammar School course. By the time the pupil reaches High School he is started on a course that he stands a fair chance of continuing, and is familiar with the studies and methods.

Besides sorting out pupils into a variety of groups according to their plans and abilities for future school work, the Junior High does more than formerly for the group that because of limited ability or finances cannot go further in school. Almost every individual has ability in some direction, and the large numbers of pupils in this new organization, and the variety of studies make it possible to give such pupils a more profitable course.

As time goes on the teaching becomes much better because teachers develop their specialities and can pass on to large numbers of pupils the results of their extensive travels or research. The schools can also plan a development of important adjuncts to education, such as moving pictures, orchestras, and various clubs.

There are weaknesses to correct, and accommodations and equipment for many branches of work that are still to be secured, but the progress and the present efficiency of the Junior High in Lowell are very satisfactory.

VACATION CLASSES

Vacation or review classes for children of the upper grades in elementary schools have been maintained by the Department since the summer of 1922; these classes are held for a period of six weeks in the Green School, the length of the session being two and a half hours. The classes were organized for the benefit of pupils of the upper grades of the public schools and for pupils of private schools also who might wish to attend them. The work is of very simple character and is designed especially for pupils who need extra time and who suffer generally from complete separation from their books during the long vacation.

Vacation classes for High School pupils have been maintained since the summer of 1923, for a term of six weeks, the length of the session being two and a half hours.

There are classes also in sewing and cooking for girls and in shop work for boys in connection with the Summer playground activities of the Park Department, the work of these classes beginning and ending with the playground activities.

EVENING AND MILL CLASSES

Reference to the school directory and the printed roster of schools will show a very extensive organization of classes outside the regular day schools of the city.

Industrial conditions and reduced immigration have had the effect of lessening greatly the number in evening and mill classes.

The evening schools have been for a number of years on a strictly professional basis. Owing to the large number of pupils who seek instruction in the High School it has been necessary to employ a few teachers who are not members of the day school corps, but the teachers are in the main regular day school teachers. The great demand for evening classes in dressmaking, millinery and cooking has called into the service many teachers who are not employed in the day vocational schools. Evening elementary classes, mill classes and Americanization classes are taught exclusively by regular day school teachers.

All vocational, Americanization and mill classes are conducted as a joint enterprise by the state and the city; the state has a supervisory interest in this work and reimburses the city to the extent of one-half the maintenance cost of the classes.

**SUMMARY OF EVENING SCHOOL ATTENDANCE

SCHEDULE OF SCHOOL SESSIONS AND VACATIONS

High School:—8.15 A. M. to 1.45 P. M.
Junior High Schools:—8.30 A. M. to 11.30 A. M. and 1.15 P. M. to 3.45 P. M.
Elementary Schools:—8.30 A. M. to 11.30 A. M. and 1.45 P. M. to 3.45 P. M.
Middlesex Village:—9 A. M. to 12 M. and 1.30 P. M. to 3.30 P. M.
Lexington Avenue:—9.15 A. M. to 12.15 P. M. and 1.15 P. M. to 3.15 P. M.
Vocational School, Boys':—8.30 A. M. to 12 M. and 12.30 P. M. to 3.30 P. M.
Vocational School, Girls':—8.30 A. M. to 12.30 P. M. and 1 P. M. to 3.30 P. M.
Evening High School:—7 P. M. to 9 P. M.
Evening Vocational Schools:—7.15 P. M. to 9.15 P. M.
Evening Elementary Schools:—7 P. M. to 9 P. M.

VACATIONS

Summer Vacations—from the Wednesday preceding the last Friday in June to the second week in September.

The week which includes Christmas.

The week beginning with the ninth Monday and the week beginning with the eighteenth Monday after the Christmas vacation.

Hours for ringing the no-school signal:—7.15 A. M., 12.45 P. M., and 6.05 P. M.

Respectfully submitted,

HUGH J. MOLLOY,
Superintendent of Schools.

AUDITOR'S STATEMENT

1925

Daniel E. Martin, City Auditor

City of Lowell

Lowell is situated at the confluence of the Merrimac & Concord Rivers. Was settled in 1653, called Chelmsford Grant. First town meeting in 1654.

Was originally a part of Chelmsford.

Owens its own water supply.

Incorporated as a Town in 1826.

Incorporated as a City in 1836.

Part of Tewksbury annexed in 1834, 1847, 1898, 1906.

Part of Dracut annexed in 1851, 1874, 1879.

Part of Chelmsford annexed in 1826, 1874.

Population 112,759.

Has 226.09 miles of streets 149.30 accepted, 76.79 unaccepted.

Has 136.33 miles of sewers.

Has an area of 14.1 square miles.

Assessed valuation \$145,404,663.00 and 30,639 assessed polls.

Tax rate \$31.80 per \$1,000.00 per cent of valuation 100.

Bonded indebtedness, December 31, 1925, \$5,894,670.00 sinking funds \$253,600.57.

SCHOOL DEPARTMENT. 107 High School Teachers, 101 Junior High School teachers, 126 Grammar School teachers, 125 Primary School teachers, 33 Kindergarten teachers, 26 special teachers, 19 Substitutes, 42 Evening High teachers, 30 Evening Elementary School teachers, 73 Evening Vocational School teachers, 31 Day Vocational School teachers, 17 Americanization teachers, and 11 Continuation School teachers.

FIRE DEPARTMENT. 218 officers and men, 178 fire alarm boxes, 1588 hydrants, 26 fire apparatus (not including water tower.)

WATER DEPARTMENT. Date of construction, 1870 to 1873; high service, 1881, driven wells, 1893 to 1919.

Source of supply—Two hundred ten (210) driven wells in the valley of River Meadow Brook, and five hundred and fifty-five (555) driven wells at Pawtucket Boulevard.

Mode of supply—Pumping to reservoir and pumping direct. Filtered through coke and sand.

Daily capacity 10,000,000.00 gallons; 172.61 miles main; reservoir capacity 5 days supply; consumed 6,184,999 gallons daily.

PARK DEPARTMENT. 208.0933 acres of parks and playgrounds valued at \$1,023,264.00.

Has five national banks, one trust company.

Has seven savings banks.

Has three co-operative banks.

Has 16 1-2 miles waterways.

Develops about 30,000 h. p. daily by means of 6 1-2 miles of canals, which furnish power for manufacturing plants.

Has the largest textile school.

Has more than 1000 manufacturing plants.

Sections of Ordinances of City of Lowell

The financial year shall begin on the first day of January and end on the thirty-first day of the following December, including both days and all department books and accounts must be run accordingly.

All departments and offices of the city government shall keep and furnish such records in book form or otherwise as shall be prescribed by the City Auditor.

All accounts rendered to or kept in the departments of the city shall be subject to the inspection of the City Auditor.

All or any city departmental officials, collecting money due the city for licenses, fees, fines, services rendered or for material sold or for any other purpose, for which no bill was previously rendered, shall pay all such collections over to the City Treasurer on or before the last day of each month.

All bills or claims for work performed must be presented to the departments ordering the same; those for supplies furnished and on account of contracts therefor should be presented to the Purchasing Agent.

All bills or claims should be received by the city on or before the first day of the month.

All department receipts for materials and supplies should be sent to the purchasing agent on or before the third day of the month, as it is impossible for him to approve bills for payment in due course after that date.

All bills after approval by each commissioner should be listed and sent to the Auditor's Department not later than the eighth day of each month.

All bills or other claims, before they are finally certified by the City Auditor or paid shall be approved by the Mayor.

All bills approved will be paid on the fifteenth day of each month.

Auditing Department

To the City Council of the City of Lowell,

Gentlemen:—

Pursuant to the provisions of law made and provided, herinafter is submitted a report of the City Auditor of the City of Lowell, concerning all business transactions of the city during the fiscal year of 1925.

Respectfully

DAN. E. MARTIN,
Auditor.

Year 1925

HIGH STREET CHURCH CLOCK

The clock was built in 1861 under the direction of Mr. George Hedrick. It was to be paid for by popular subscription, but after some time Mr. Hedrick was obliged to make the final payments and it became his property. In 1877, the City Government, by resolution purchased the clock of Mr. Hedrick. The terms of the purchase required the City to keep it in repair at the High Street Church.

Jonathan Tyler Worthy Poor Trust Fund

Deposited with the Washington Inst. for Savings, Book No. 23549.

Amount on deposit, January 1, 1918\$10,000.00

Resolutions, numbered 14 and 74, passed by the City Council, May, 1878:

"That the City of Lowell be appointed trustee of the sum of \$10,000.00, and that the City Treasurer is authorized to pay to the Ministry-at-Large the interest of said sum at the rate of 6 per cent. forever. Said Sum to be used for the benefit of the worthy poor of the City. Said Ministry shall make an annual report of their dispensing said money to the City Council." This fund was restored in 1914, and City is paying 4 per cent only.

Thomas Nesmith Fund

\$25,000.00. Annual Interest, \$1,500.00

Resolution, numbered 57, passed by the City Council, November, 1870:

"That the sum of \$25,000.00 be accepted by the City and that the interest, at the rate of 6 per cent, be paid to the trustees, and that they in turn pay to the Ministry-at-Large, or to like people, as they may decide. Said sum to be used for people in temporary need of charity without distinction of race, color, or religion. Trustees: A. K. Chadwick, A. G. Cumnock, Thos. Nesmith, G. R. Chandler, Treasurer. In case of a vacancy, the remaining trustees shall report to the Justice of the Court, who shall appoint a successor to fill said vacancy." This fund was restored in 1923.

Carney Medal Fund

Received of James G. Carney, in 1858 and 1859, the amount of \$200, which is to remain a perpetual debt of the City forever: the interest to be applied in payment for the "Carney Medals" to the departments of the High School (annually).

For the information of the citizens of Lowell the Auditor respectfully refers them to the "Annual Report of the School Committee," or the year 1859, where all the correspondence between the donor and the recipient may be found. This fund was restored in 1923.

Thomas Nesmith Fund

Resolution, numbered 54, passed by the City Council, April, 1870: "That the City of Lowell be appointed trustee of the sum of \$1,000.00 and the City Treasurer is authorized to pay to the High Street Church the interest of said sum at the rate of 6 per cent. forever. Said sum to be used by the Pastor and Deacons of said Church to sustain the Sunday School and its library for the moral and religious instruction of the children." This fund was restored in 1923.

The Commonwealth of Massachusetts
DEPARTMENT OF CORPORATIONS AND TAXATION
DIVISION OF ACCOUNTS

REPORT
OF AN AUDIT OF THE ACCOUNTS
OF THE
CITY OF LOWELL
FOR THE YEAR ENDING DECEMBER 31, 1925

Made in Accordance with the Provisions of Chapter 44, General Laws.

JUNE 9, 1926

June 9, 1926.

To the Honorable John J. Donovan, Mayor,
and the Municipal Council,
Lowell, Massachusetts.

Gentlemen:

I submit herewith my report of an audit of the accounts of the City of Lowell for the year ending December 31, 1925, made in accordance with the provisions of Chapter 44 of the General Laws. This report is in the form of a report made to me by Mr. Edward H. Fenton, Chief Examiner of this Division.

Very truly yours,

THEODORE N. WADDELL,

TNW|AMH

Director of Accounts.

Mr. Theodore N. Waddell,
Director of Accounts,
Department of Corporations and ~~T~~axation,
State House, Boston.

Sir:

In accordance with your instructions, I have made an audit of the books and accounts of the City of Lowell for the year ending December 31, 1925, and submit the following report thereon:—

The financial transactions of the city, as recorded on the books of the several departments, were checked and compared with the books in the auditor's office.

The surety bonds furnished by the departmental officials for the faithful performance of their duties were examined and found to be in proper form.

The books and accounts in the auditor's office were examined and checked; the records of receipts were checked with the treasurer's books and with the records in the several departments collecting money for the city. The reported disbursements were checked with the treasury warrants authorizing the payment of money and with the treasurer's cash book.

The appropriation accounts were examined and all appropriations, transfers and loan orders were checked with the records of the City Council.

The accounts receivable ledger, in which is entered the detail of the departmental accounts receivable, was examined and checked with the bills made out by the several departments and with the payments to the treasurer.

The records of debt issued were examined and the loans were found to be properly authorized. The reported payments on account of debt and interest were compared with the amounts falling due, and the outstanding debt was listed from the debt record and proved with the auditor's ledger.

The ledger accounts were examined and checked, a trial balance was taken off, proving the ledger to be in balance, and a balance sheet, showing the financial condition of the city as of December 31, 1925, was prepared and is appended to this report.

The books and accounts of the treasurer and collector were examined and checked. The reported receipts as recorded on the cash book were checked with the reports to the auditor and the departmental records, and the payments by the treasurer were compared with the warrants authorizing them and with the auditor's books.

The cash on hand was verified by an actual count, and the bank balances were reconciled with the statements furnished by the banks.

The commitments of taxes, assessments and departmental charges were proved to the warrants, and the receipts were checked with the payments to the treasurer and with the auditor's books. The abatements were checked with the departmental reports of abatements granted, and the outstanding accounts were listed and proved to the accounts in the auditor's books. A further verification of the outstanding accounts was made by mailing notices to a number of persons whose names appeared on the books as owing money to the city, and from the replies received I am satisfied that the outstanding accounts as listed are correct. Abatements should be obtained from the departments for the departmental bills which have been determined as uncollectible.

The receipts of the city clerk's department for licenses and permits were checked in detail with the records of licenses and permits issued and the fees for recording were verified by the records in the several books. The payments to the treasurer were compared with the treasurer's and the auditor's books.

The hunting and fishing licenses and the dog licenses issued were examined, and the payments to the state and the county were verified by the receipts on file.

The receipts of the license commissioners were examined and checked. The records of licenses issued were checked with the copies of licenses on file, and the payments to the treasurer were compared with the treasurer's and the auditor's books.

The records of the receipts of the library department were examined and checked, the payments to the treasurer being compared with the treasurer's and the auditor's books. At the end of the year there was \$84.75 cash on hand, this amount being paid to the treasurer in January and February, 1926.

The financial records of the water department were examined, the abatements and discounts being checked and the outstanding accounts listed and proved with the auditor's books. The reported collections were checked with the treasurer's and the auditor's books.

The records of cash received at the cemetery office were checked and the payments to the treasurer were compared with the treasurer's and the auditor's books.

The records of receipts from the milk inspector, the sealer of weights and measures, the public scales and the vocational schools, as well as from the building, fire, health and park department, were examined and the payments to the treasurer were checked with the treasurer's and the auditor's books.

In addition to the departments and accounts mentioned, the accounts of all other departments receiving money or committing bills for collection were examined and checked.

The investments of the sinking and trust funds were examined and listed and the additional cemetery perpetual care funds were verified and the income proved, all of which was found to be correct.

Recommendations were made in our report of the previous audit that a special appropriation be made to take care of the deficit of water income. No action was taken, however, and, as the water department receipts for last year were not sufficient to meet the expenditures of the department, the deficit was increased, making the amount at the close of the year \$49,731.27. This matter should receive attention, instead of leaving it to chance that there would be an unexpended balance of water income to reduce it.

Although the surplus revenue represented by the "Prior Revenue" account shows an increase over the amount shown in the last audit report, it must be considered that this account is represented by uncollected taxes, departmental bills and other accounts receivable, some of which are probably of no value or of doubtful value. Appropriations for expenditure of cash, therefore, should not be made from the surplus revenue until the cash is available by collection of the accounts which represent it.

Careful consideration should also be given to the department appropriations before the tax rate is fixed for 1926, and if it is found that any appropriations are not sufficient for the requirements of the departments for the balance of the year, additional appropriations should be made, to be raised in the revenue of the current year, otherwise the work should be curtailed.

Appended to this report are tables showing a reconciliation of the treasurer's cash, summaries of the tax, assessment, and departmental accounts receivable, together with tables showing the transactions of the sinking and trust funds.

For the co-operation and courtesy extended by every departmental official during the process of the audit, I wish, on behalf of my assistants and for myself, to express appreciation.

Respectfully submitted,

EDW. H. FENTON,
Chief Examiner.

ANNUAL REPORT
OF THE
Births, Marriages
and Deaths
OF THE
CITY OF LOWELL

FOR THE YEAR

1925

CITY OF LOWELL

OFFICE OF THE CITY CLERK, May 11, 1926

To the City Council,

Gentlemen:

The annual report of Births, Marriages and Deaths for the year 1925, as of record in the office of the City Clerk is respectfully submitted as follows:

BIRTHS

Total number recorded, exclusive of Still-births is 2773, of which 170 occurred in Lowell the parents being residents elsewhere, and 66 occurring elsewhere the parents being residents of Lowell. Following is a table by wards, of births occurring in Lowell the parents being Lowell residents.

Wards	1	2	3	4	5	6	7	8	9	10	11	Total
Whole Number	218	386	152	187	276	277	343	115	152	277	154	2537

DEATHS

Total deaths recorded in 1925 was one thousand six hundred and fifty-nine, of which one hundred and two were non-residents who died in Lowell, and one hundred and five residents who died elsewhere.

Detailed statistics relative to deaths are contained in Report of Board of Health.

Respectfully submitted,

STEPHEN FLYNN,

City Clerk.

In City Council May 11, 1926.

Read and ordered on file.

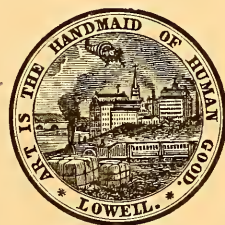

STEPHEN FLYNN,

City Clerk.

ISOLATION HOSPITAL

FORSTER H. SMITH, M. D., Superintendent
STELLA M. SMITH, R. N., Superintendent of Nurses.
HELENE M. MORRIS, Clerk.

Lowell, Mass., Jan. 1st, 1926.

**To the Honorable Mayor and Members of the Municipal
Council of the City of Lowell.**

Gentlemen:

The forty-eighth annual report of the BOARD OF HEALTH for the year ending Dec. 31, 1925, is respectfully submitted.

The total number of deaths in Lowell for the year 1925 numbered 1554 or **nine** more than for the year 1924, making a death rate of 13.78 per 1000 (based on population of 112,759) against 13.70 in 1924. These figures include deaths of non-residents, but exclude Stillbirths.

INFANT MORTALITY

The deaths of infants under one year of age for the year 1925 numbered 230 (against 275 in 1924) and represents an infant mortality rate of 82.9 (against 91.02 in 1924). This rate is based on 2773 **Recorded Births**, and is the lowest infant mortality rate available in the history of Lowell. It is very gratifying to note this substantial death rate as compared with previous years, and these results may be attributed to the educational work of the department nurses, and other allied organizations interested in Infant Welfare Work. When we consider that the Department has no Baby Welfare Clinics of any description, except the privilege of referring cases to the Lowell Guild, we feel that the results obtained are very creditable.

The **Deaths of Children** from One to Five Years in 1925 were 115 against 72 in 1924.

DISEASES DANGEROUS TO PUBLIC HEALTH

TUBERCULOSIS

151 cases of tuberculosis (against 188 cases in 1924) were reported during the year, and of this number 117 (against 153 in 1924) were Pulmonary Tuberculosis and 34 (35 in 1924) were All Other Forms of the Disease. The death rate .79 (.99 in 1924) per thousand of the population was considerably lower than during the previous year.

This is also a very creditable showing and is due in a great measure to the work of the department nurses, and the nurse supplied by the Lowell Tuberculosis Council, who by persistent effort, endeavor to hospitalize all active cases living under unfavorable conditions at home, as well as to have contacts (particularly children) examined regularly at the Tuberculosis Clinic.

DIPHTHERIA

50 cases of diphtheria (against 113 in 1924) were reported for the year with four (4) deaths (10 in 1924) making a mortality rate of 8% total cases, which was the same as during the previous year.

The great decrease in the incidence of diphtheria for the year 1925 compared with the previous year was very noticeable, and was the lowest record for many years. It is the opinion of many experts in the public health service that if infants were immunized against Diphtheria soon after they are six months of age, and also children up to six years, it would be only a few years when this disease would be eradicated.

SCARLET FEVER

265 cases of Scarlet Fever against 135 in 1924 were reported with 3 deaths (against 1 death in 1924).

TYPHOID FEVER

10 cases of Typhoid Fever (14 in 1924) were reported with **No Deaths** in 1925 (against 2 deaths in 1924).

The year 1925 stands out very prominently in Public Health Work, as it was the first year within the history of the City of Lowell that there were no deaths from Typhoid Fever. For the past three years previous, the morbidity and mortality rate for this dreaded disease has been very low, and has been cited in many public health reports.

OTHER CONTAGIOUS DISEASES

1954 cases of Measles (205 in 1924) were reported during the year with 13 deaths (none in 1924).

6 cases of Infantile Paralysis (against 15 in 1924) were reported with 2 deaths in 1925 (against 1 death in 1924).

6 cases of Cerebro-Spinal Meningitis (against 4 in 1924) were reported, with 4 deaths each year.

98 cases of Lobar Pneumonia (61 in 1924) were reported with 53 deaths (against 30 deaths in 1924).

48 cases of Whooping Cough (31 in 1924) were reported with no deaths in 1925 (against 3 deaths in 1924).

The total deaths from all diseases dangerous to Public Health were 174 (against 171 in 1924) or a fraction over 11% of the Total Mortality.

The Board wishes to express its appreciation of the cooperation given by other municipal departments, and also to acknowledge the assistance given by the Lowell Tuberculosis Council, the Lowell Guild, and other social welfare organizations.

FRANCIS R. MAHONEY, M. D., Chairman
PIERRE BRUNELLE, M. D.
JAMES H. ROGERS, O. D.

Board of Health.

REPORT OF BACTERIOLOGIST

Total Laboratory Examinations.....		1371
Total Therapeutic Procedures (Examinations and Treatments)		6287

Examinations of the above tables show an admission of 349 cases during the year. Of this number the clinic patients themselves referred 26.3% to the Clinic, Doctors 22.6%, Hospitals 14.9%. Sixty-one patients were discharged to private physicians and hospitals, sixty were discharged as probably cured, fifty-seven lapsed treatment before being cured. Seventy-four patients came to the clinic for examination and showed no evidence of Venereal Disease.

A total of 649 Follow-up letters were sent. One hundred personal visits by the clinic nurses and health inspectors were made on cases lapsing treatment. A total number of 6287 examinations and treatments were given during the year.

The clinic is indebted to the work of Miss Titcomb and Mr. Milot for the social follow-up work outside of the regular clinical hours. Miss Costello of the Lowell Police Department has assisted in cases referred by the Probation Officers and the Court.

Mr. Connors of the Board of Health has obtained excellent results in returning male cases to treatment where efforts of the clinic nurses had failed.

We are indebted to the Lowell General Hospital for sending us two pupil nurses for the Women's evening clinic.

Respectfully submitted,

HAROLD L. LELAND M. D.,
Attending Physician Lowell G. U. Clinic.

REPORT OF INSPECTOR OF MILK

Lowell, Mass., Jan. 1st, 1926.

To the Honorable Board of Health.

Gentlemen:

I have the honor to present the report of the Milk Inspection Department for the year beginning Jan. 1st, 1925.

4952 samples of milk were examined.

3704 samples of milk were examined chemically.

1248 samples of milk were examined for bacterial content.

2156 Lorenz sediment tests were made.

1096 wagon temperatures were obtained.

3109 samples were seized from wagons.

935 samples were seized from restaurants and stores.

129 samples were seized from producers, schools and country milk plants.

779 samples were brought in by producers, dealers, and consumers.

Pasteurized milk averaged for the year 12.63% total solids; 3.78% fat; median bacterial count 88,000 per c. c.

Raw milk averaged for the year 12.53% total solids; 3.70% fat; median bacterial count 78,000 per c. c.

The monthly averages of samples seized from dealers follows:

	Total Solids	Fat	Pasteurized Bac. per c. c.	Raw Bac. per c. c.
Jan.	12.69	3.90	82,000	78,000
Feb.	12.59	3.82	169,000	70,000
Mar.	12.47	3.71	88,000	41,000
Apr.	12.49	3.64	49,000	57,000
May	12.49	3.66	135,000	115,000
June	12.39	3.64	96,000	49,000
July	12.31	3.51	53,000	78,000
Aug.	12.40	3.64	57,000	69,000
Sept.	12.61	3.76	115,000	106,000
Oct.	12.88	3.89	115,000	82,000
Nov.	13.01	3.98	73,000	90,000
Dec.	12.78	3.90	82,000	90,000
Standard	12.00	3.35	100,000	500,000

928 stores were issued licenses to sell milk.

71 stores were issued oleomargarine licenses.

73 milk wagon licenses were issued.

\$536.00 were obtained from licenses.

Inspections of creameries, milk plants, and dairy farms were made in New Hampshire, Vermont as well as locally.

The average daily consumption of fluid milk was 43,240 quarts.

63.45% of the milk consumed was pasteurized; 36.55% was raw.

Respectfully submitted,

MELVIN F. MASTER, B. S.

REPORT OF DIRECTOR OF DIVISION OF SCHOOL HYGIENE

Lowell, Mass., Jan. 1st. 1926.

To the Board of Health.

Dears Sirs:

We have the honor to submit the report of the Sub-Division of School Hygiene.

Our nursing personnel has been increased to ten nurses. One nurse has been assigned to the High School full time, and as can be seen from her report, is, no doubt, filling a long felt need.

REPORT OF THE SUPERINTENDENT OF THE LOWELL ISOLATION HOSPITAL

Lowell, Mass., Jan 1st, 1926

To the Board of Health of the City of Lowell.

Gentlemen:

I have the honor of submitting to you the fifth annual report of the Lowell Isolation Hospital for the year ending December 31, 1925.

On January 1, 1925, there were in the hospital 39 tuberculosis and 9 contagious patients, a total of 48. There have been admitted 42 males and 47 females in the tubercular wards and 78 patients in the contagious ward. These figures show that we have treated 128 tubercular patients and 87 contagious cases. On December 31, 1925, there were 44 patients in the hospital; 21 males and 21 females in the tubercular wards and 2 cases of scarlet fever in the contagious ward.

The lowest number of patients on any one day during the year was 41 and the highest number of patients was 58. The daily average in the tubercular ward was 46.1 and the daily average in the contagious ward was 4.1, a daily average in both departments 50.2, the highest daily average since the hospital was opened. The total number of hospital days was 18,325 for the year.

There were 87 patients discharged from the tubercular ward — 69 pulmonary cases, 4 non-tubercular cases, and 14 cases of tuberculosis other than pulmonary tuberculosis. Of the 69 pulmonary cases 8 were discharged as arrested, 14

improved, 1 slightly active, 12 unimproved, and 34 died. The 14 non-pulmonary cases discharged were classified as follows: 2 tuberculosis laryngitis cases, 1 improved and 1 died, 1 tubercular meningitis case died, 2 tubercular hip cases, 1 improved and 1 unimproved, 4 tubercular spine cases, 3 improved and 1 transferred to another hospital for surgical treatment, 2 suspicious tubercular cases transferred to other hospitals for treatment; 1 mediastinal tumor case improved; 2 tubercular peritonitis cases died.

The contagious ward has been open practically the entire year and 78 cases have been admitted during the year; 9 cases of diphtheria, 9 of erysipelas, 21 of scarlet fever, 32 of measles, 1 of chickenpox, 1 of trachoma, 2 of epidemic cerebro-spinal meningitis, 1 of cerebro-spinal meningitis and measles, 1 of broncho-pneumonia, 1 of whooping-cough and measles. Of these, 71 were discharged entirely recovered. One scarlet fever died; 1 broncho-pneumonia case died; 1 erysipelas case died a few hours after admittance; 1 epidemic cerebro-spinal meningitis case died about an hour after entering the hospital; 1 diphtheria case died three hours after being admitted to the hospital. Two patients were still in the contagious ward January 1, 1926.

The total expenditures for the year ending December 31, 1925, were \$69,227.95. These expenditures were divided as follows: \$51,037.74 for the tubercular ward and \$18,190.21 for the contagious ward.

The per capita cost of the tubercular ward for the year 1925 was \$3.03 per day and the per capita cost of the entire hospital was \$3.77 per day.

However, to offset these expenditures it must be remembered that the City Treasurer has received the sum of \$13,386.57 from various sources for the care of patients at this hospital, which sum considerably lowers the actual cost to the city and brings down the net per capita cost to \$3.04 per day.

This sum of \$13,386.57 received by the City Treasurer is divided as follows:

Cash from tubercular patients.....	\$ 358.58	
Town of Maynard for tubercular patient....	49.29	
Received from State for tubercular patients..	10,524.28	
Received from U.S.Veterans' Bureau for tuberculosis	1,132.50	
		<hr/>
Total received for tubercular patients		\$12,064.65
Cash from contagious patients.....	496.45	
Received from State for contagious patients	510.00	
Received from other cities and towns for contagious patients	315.47	
		<hr/>
Total received for contagious patients		1,321.92
		<hr/>
Total received from all sources.....		\$13,386.57

BELOW IS THE FINANCIAL STATEMENT FOR THE YEAR 1925

Initial appropriation, salaries.....	\$31,000.00	
Addition appropriation, salaries.....	5,833.93	
Amount expended for salaries.....	\$36,517.68	
Bal. on hand Jan. 1, 1926	316.25	
	<hr/>	
	\$36,833.93	36,833.93
Initial appropriation, expenses.....	\$30,000.00	
Transfer, Outdoor relief	201.44	
Transfer Charity Dept.	126.44	
Additional appropriation	2,000.00	
Amount expended for supplies	\$32,268.66	
Bal. on hand January 1, 1926.....	59.22	
	<hr/>	
	\$32,327.88	\$32,327.88
Extra bill schedule for year 1925.....	\$441.61	
Special appropriation, 1926 revenue.....		\$441.61

RECOMMENDATIONS

I would like to call attention of the Board again to work to be done on the hospital grounds.

The roads within the hospital grounds proper are in poor repair and need a layer of crushed stone.

I also recommend that proper legal steps be taken to have West Meadow Road accepted as far as the hospital entrance. This can easily be accomplished now, as the road has been widened and brought practically to grade. By so doing, we shall be relieved of the responsibility of keeping it clear of snow in winter and repaired in summer.

The grounds themselves can be beautified to a greater extent by laying out more trees to replace those that have died or have been damaged by severe storms. These need not necessarily be fruit trees but may be shade or pine trees.

All these suggestions, if carried out, will certainly help to improve and make more attractive the institution and will carry out the plans originally made when the hospital was built.

Respectfully submitted,

FORSTER H. SMITH,

Superintendent.

REPORT OF EXAMINING PHYSICIAN FOR THE TUBERCULOSIS CLINIC

Lowell, Mass., Jan. 1st, 1926.

Board of Health, Lowell, Mass.

Gentlemen:

I have the honor to submit the following report of the work done in the Tuberculosis Clinic for the year 1925.

4 Deputy Chiefs	3 Telephone Operators
1 Drill Master	2 Chauffeurs
1 Clerk	137 Hosemen
1 Fire Alarm Operator	44 Laddermen
	20 Patrolmen

A total of 218, of which 21 are Captains and 19 Lieutenants.

They are divided into companies as follows:

- 10 Motor Engine Companies.
- 4 Motor Hose Companies.
- 4 Hook and Ladder Companies.
- 1 Protective Company.

CHANGES DURING THE YEAR

Appointed, permanent	19
Died, permanent	2
Discharged	1
Pensioned	4
Promoted	3

APPARATUS

The apparatus of this department is kept in the best possible condition and consists at present of:

Chief's Automobile	1
Deputy Chiefs' Automobiles	2
Electrician's Automobile	1
Combination Motors, Chemical and Hose Wagons	4
Triple Combinations	10
Aerial Ladder Truck	1
Auto Patrol Wagon	1
City Service Trucks	3
Service Car	1
Fire Extinguishers	37

RESERVE APPARATUS

Deputy Chief's Automobile	1
Aerial Ladder Truck	1
Hale Water Tower	1
Steam Fire Engines	5

TELEPHONE

The telephone system is the same that was installed in 1913, consisting of one thirty-line switchboard located at the Palmer Street Station, which is connected with the Central office of the New England Telephone and Telegraph Company by two toll lines, and also the fourteen different fire stations, the Chief's office and residence, three Deputy Chiefs' residences and battery room with eleven local lines.

PROTECTIVE DEPARTMENT

This department is maintained by the City and consists of twenty permanent men. They have responded to two hundred and eighty-four alarms; in service one hundred fifty-five and three-quarters hours; spread two hundred and fifty-one covers; used thirty-one extinguishers and thirty-five tanks; raised six hundred and sixty-five feet of ladders.

FIRE PREVENTION

A systematic inspection of buildings is made by the members of the Fire Department in order to relieve the fire hazard of the city. Each company has a certain district to inspect, and each inspection is recorded on a printed slip with report of conditions found. These slips are turned over to the Chief of the Department, and, when the conditions found are considered dangerous, letters are sent to both owners and tenants to have said conditions remedied, 8,817 buildings were inspected during the year by the different companies.

FIRES AND LOSSES

The whole number of alarms during the year ending December 31, 1925, was one thousand two hundred forty-seven (1,247). Two hundred and seventy-five (275) were given from signal boxes; five hundred and forty-six (546) telephones; one hundred and ninety-three (193) stills; seven (7) automatics; twenty-eight (28) exposures; and one hundred and ninety-eight (198) reported fires. The "No School" signal was given eleven (11) times. There were three hundred and seventy-five (375) fires extinguished by chemicals alone and two hundred and fifty-eight (258) where water was used. The remaining number were extinguished by other means or had been put out before the arrival of the department. One hundred and two (102) were in brick, stone or cement buildings; four hundred and twenty-four (424) in frame buildings and five hundred and twenty-three (523)

other than building fires. The reported fires were mostly in frame buildings.

The whole amount of loss, except the reported fires was three hundred thirty-six thousand, nine hundred forty-four dollars and ninety cents (\$336,944.90); insurance, four million, three hundred seventy thousand, seven hundred ninety dollars and seventy-six cents (\$4,370,790.76); insurance paid, three hundred fifteen thousand, five hundred thirty-six dollars and fifty cents (\$315,536.50); loss above insurance, twenty-one thousand, four hundred eight dollars and forty cents (\$21,408.40); valuation, three million, five hundred thirty-two thousand, seven hundred and fifty dollars (\$3,532,750.00). The reported loss was ten thousand, seven hundred forty-six dollars and fifty-eight cents (\$10,746.58); insurance, nine million, six hundred seventy-six thousand, fifty-three dollars and fifty-one cents (\$9,676,053.51); valuation, nine million, five hundred sixty-two thousand, forty dollars (\$9,562,040.00).

There have been seven (7) alarms out of the city, to which some part of the department has responded, for which no insurances are kept; Chelmsford, 1, Dracut, 2, East Chelmsford, 1, North Chelmsford, 1, Tyngsboro, 2.

There have been fifty-five (55) fires where the loss was one thousand dollars and over.

January 10th, 55 Franklin Street, owned by Anastasia Riches and occupied by C. Malicourtis, loss \$1,378.00.

January 10th, 368-74 Merrimack Street, owned by L. H. Beaulieu and L. B. Desrosiers and occupied by several, loss \$3,779.30.

FATALITIES

October 28th—Claire Pelletier, 205 Cumberland Road, age four years. Playing with matches.

November 14th — Mrs. Catherine C. Dougherty, 17 Nichols Street, age forty-three years. Gas stove set clothing.

In conclusion I wish to extend my thanks to His Honor, the Mayor, and the City Council for the interest taken in matters pertaining to the Fire Department. I also wish to thank the officers and members of the Department for the ability, faithfulness and willingness shown in the performance of their duty. I wish to extend thanks to the Chief of Police and the members of the Police Department for the assistance rendered at fires.

Respectfully submitted,

EDWARD F. SAUNDERS,
Chief of Fire Department.

Board of Park Commissioners

CITY OF LOWELL

March 23, 1926.

Honorable John J. Donovan, and the Municipal Council of the
City of Lowell:

Gentlemen:

I take pleasure in transmitting, herewith, the annual report of the Board of Park Commissioners.

The year just closed has seen, in many respects, a very remarkable development in the use of the parks and playgrounds of the city. The new opportunities for tennis and baseball have been utilized to a greater extent than ever before and the season's experience has abundantly demonstrated the necessity of these under the present social conditions of our people.

Important developments in the construction of new centers of recreation have taken place during the year so that at the end of another season, the city will be more adequately provided for opportunities for public recreation than a great majority of cities in America. Fortunately, these areas are distributed throughout nearly all parts of our city so that they serve, to a great extent, our whole population.

One of the most important phases of this new construction work has been that relating to Shedd Park where an elaborate scheme of opportunities for out door play and

entertainment has been nearly completed. This will be finished early the coming summer and will mark a very distinct advance in the park system of the city.

The Board of Park Commissioners wish to express to Superintendent John W. Kernan and his associates, especially to Mr. Arthur C. Sullivan and the playground teachers, their hearty thanks for the splendid work they have done during the year and the fine spirit of co-operation that has prevailed throughout the department. We wish also to express to His Honor, the Mayor John J. Donovan, to the City Council, and to the various heads of the city departments, our obligations for help in many ways. We also are indebted to the newspapers of the city for a great amount of publicity which has helped to extend the use of the parks and playgrounds and has brought to the general public, a knowledge of the important events which have been taking place.

Respectfully submitted,

CLARENCE M. WEED,
Chairman.

Superintendent's Report

To the Board of Park Commissioners.

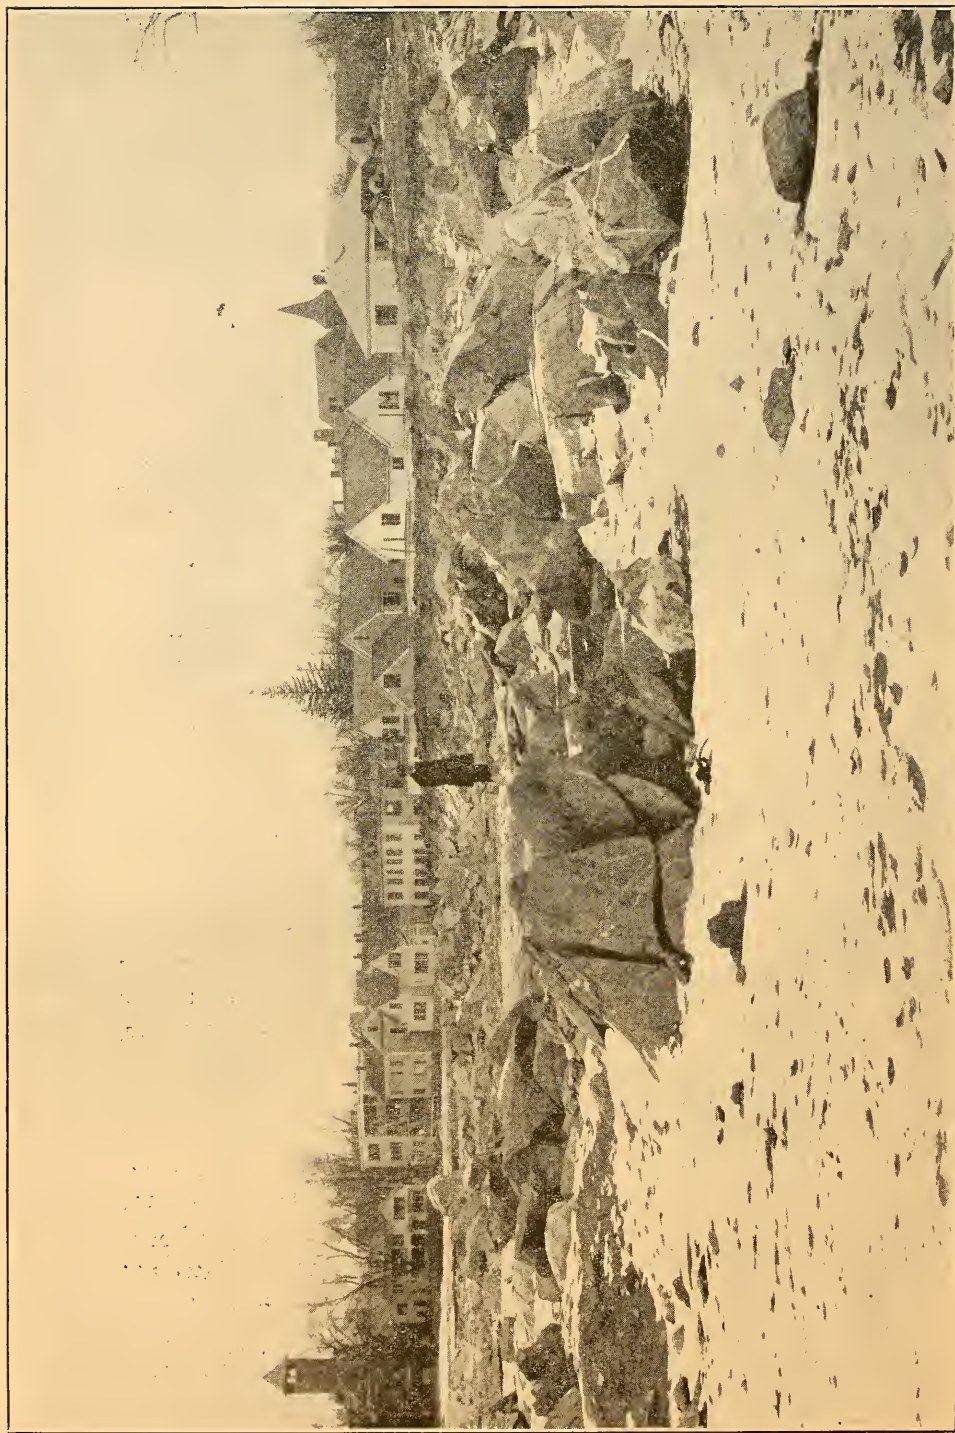

Gentlemen:

I herewith most respectfully submit my annual report of the work done under your direction in the Park System during the year ending December 31, 1925.

The year just closed has been the banner year for Park activities, and development since the Board was established. New areas were acquired and development plans made, which were carried out in so far as funds available would permit. It is hoped that sufficient money will be available in 1926 to complete work already under way, which was started last year.

At O'Donnell Playground on Gorham Street (formerly the old Fair Grounds) a section along the street was graded and laid out following a definite plan. A foundation was laid for four Tennis Courts and they are now ready for a top surface the coming year. With the installation of the back stop wires, they will then be ready for use. Between the Courts and the street there will be a fine stretch of lawn area in which a number of trees will be planted giving shade, where it is very much needed.

In Centralville, development work was started on the new Centralville Playfield situated on Bridge Street and which was formerly known as the Hall Land. This tract comprises about nine acres and was acquired late in 1924 for the assessed value, and during last year an additional strip of two and one-half acres was purchased. This too

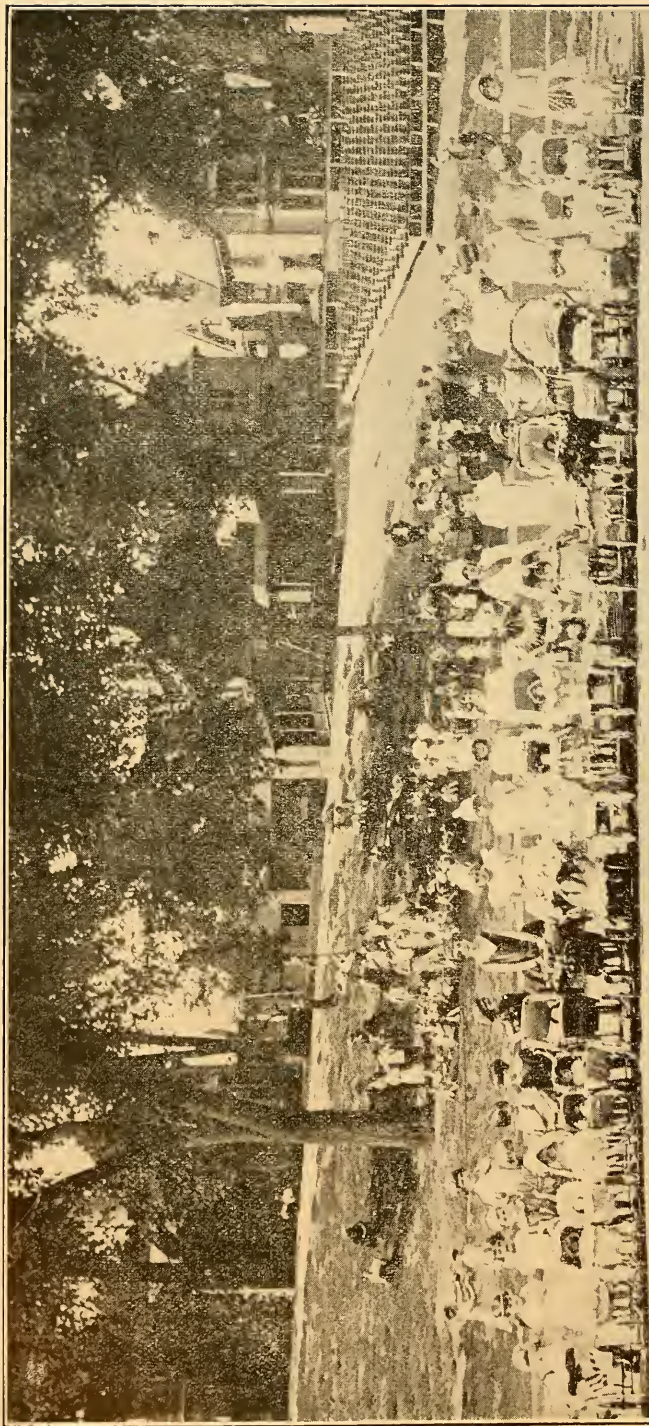

LEDGE AND BOULDERS ENCOUNTERED IN DEVELOPMENT AT PAWTUCKETVILLE PLAYGROUND

was acquired at the assessed valuation. The acquisition of these two parcels was a little unusual, in as much as all of our recent additional park land was taken over at a price in excess of the assessed valuation. This gives us a much needed frontage on Richardson Street, making the field much more accessible. Here also a definite development plan was made and adopted by the Board. Work was started during the summer and continued throughout the remainder of the year. Coming in contact with a bunch of ledge retarded us somewhat in our grading, but we have been able to make two baseball diamonds and lay the foundation for four tennis courts, aside from the general grading of the grounds. It is hoped to complete the tennis courts this spring, and also carry out a general scheme of planting, especially of trees. Much should be done along this line as there is hardly any shade here, during the hot summer days.

Work was started late in the summer at Pawtucketville Playground, located at the corner of Mammoth Road and Woodward Avenue in Pawtucketville. The slope in the rear was cut down, using the same to make the steep fill on the Mammoth Road side of the field. In doing this a countless number of boulders were met, necessitating the drilling and blowing of same, before they could be handled. We expect to continue this work another year making room for a few tennis courts and other playground games, so that this section of the city will be fairly taken care of in the way of facilities for out-door activities.

At Wannalancit Park on Varnum Avenue we continued the Iron Fence on top of the riverbank wall near the falls a distance of 266 lineal feet, and graded off between that point and the roadway, sewing same down to grass.

We have definite plans made for both the riverbank park on Riverside Street in Pawtucketville, and the First Street Oval in Centralville, but the costs of both projects are much beyond our means for the present.

A FEW OF THE ENTRIES IN DOLL CARRIAGE PARADE SOUTH COMMON, AUGUST, 1925

The Shedd Bequest of \$100,000.00 became available in the early part of the year for the development of Shedd Playground. A careful study was made of the project, together with the amount of money at hand and it was finally agreed that it was a physical impossibility to develop the whole area with the fund. Accordingly plans were made for two-thirds of the playground which would include about thirty-seven acres. They called for a running track, soccer field, two baseball fields, eight tennis courts, children's playground, open-air theatre, swimming pool, wading pool for little children, a pond at the lower end, 11,000 square yards of walks and drives, besides a choice planting list of shrubs and trees. Careful consideration was given to whether we should do the work ourselves or let the job at contract. The latter course was taken because more work could be accomplished for the money available and it was desirable to get the work done as quickly as possible. Bids were called for and the construction job was finally awarded to Mr. Frederick F. Meloy, being the lowest among nine bidders, and also a local man. He handled the work in a business-like manner and nearly completed his contract before the cold weather caught him, forcing him to quit work for the winter. Only a few thousand dollars worth of work remains, which will be finished in the early spring. In the scheme of development of the playground, the building of a field house was considered. Late in the summer plans were drawn for such a building having toilet facilities, showers, lockers, and quarters for the change of clothing. It was decided that a building of this sort was a necessity, because of the nature of the activities planned. After bids had been called for, it was found impossible to let a contract, because our balance available from the Shedd Bequest was insufficient. The bids on the work ran higher than was anticipated. It is hoped that additional funds will be provided this year, so that the field house may be speedily built.

The maintenance of our parks is beginning to grow quite considerably, as we are constantly adding one or two

SKATING RINK — HIGHLAND TENNIS COURTS

acres yearly. Then again they are used to a greater degree than ever before. Much litter accumulates and the necessary upkeep is constantly rising.

TREES

Strict care and attention has been given to our street trees during the past year, their condition being such that a crew of men was maintained throughout the year on tree work. The multitudinous number of wires that are strung through and about them are responsible for many defects, while others, because of the smooth paving laid too closely to the roots, have had a hard time to exist, and many times die. Our records show that we have taken care of 1102 trees having decayed or dangerous limbs, 209 trees whose branches have been trimmed on account of too much shade, and cut down 71 trees which were dead. We planted 350 new trees scattered in all sections of the city, so that our replacements exceeded the number lost. We hope to conduct an intensive tree planting campaign this year, as we all consider them an asset to the city.

PLAYGROUNDS

America's most popular health medicine today is outdoor recreation. It is nature's own route to sturdy bodies and sound nerves.

With a limited amount of funds at our disposal for playground work, we have striven hard to keep abreast of the times and with the exception of one or two sister cities in the State, have been unsurpassed in our accomplishments. Fourteen different playgrounds were operated during the year, being located in the most congested sections of the city. We were extremely fortunate in having an excellent corps of supervisors who were keen and alert in their work at all times. The usual playground games were taught, and schedules of volley ball, baseball games, etc., were carefully

arranged and diligently carried out. It was really surprising to witness the great interest the children displayed in their league games and the loyalty they showed for their respective teams. Fair play was more in evidence than ever before; and that being one of our aims in playground work, I felt amply repaid for all our league activities.

One of the major events of the season, was held in mid-summer at the South Common Playground. It took the form of a doll carriage parade, and had entries from all the playgrounds of the city, there being about seventy-five in all. Great interest was aroused by the children, not so much for the best individual display, but more in the interest of their respective playgrounds. Prizes were offered for the best display, and the judges in charge had a very difficult task to pick the winners. Besides keeping the interest of the children, it brought into play the industrial side of our playground work, and the patterns and designs exhibited were far beyond our expectations.

With our wading pool at the South Common opportunity is offered for swimming instruction to the playground children. The pool is shallow, yet deep enough for beginners, and offers a safe spot, and at the same time centrally located to serve two-thirds of our playgrounds. We placed in charge a young man thoroughly efficient in the art, who conducted daily classes with very satisfactory results.

Mr. Lewis MacBrayne of the Massachusetts Public Safety Council, kindly addressed our supervisors at the start of the season on the prevention of accidents, which proved a source of interest, and very beneficial to us all. It is surely worth noting that we went through the season holding the attention of 5,000 children daily, without having a serious accident.

Tennis held the attention of a goodly number of playground children during the summer and is acknowledged by all as one of the best games for the development of the body. The regular yearly tournament was held at the High-

land Courts, bringing together many contestants, as well as drawing a large gallery of spectators.

The usual closing Playground Exercises were held at the Municipal Auditorium on September 2 where the playground children portrayed "The Spirit of Americanization". They showed the dances of the various nations, with the dance of Liberty as indicative of the desire to Americanize, and its accomplishment. The children themselves made their own costumes, under the guidance of the supervisors, and they were indeed a credit to their ability along these lines. The exercises were given in the afternoon as sort of a dress rehearsal for the playground children themselves, and repeated in the evening before a capacity audience of grown ups.

During the month of May a marble contest sponsored by the Courier-Citizen newspaper was of interest, as it brought together a large number of playground children. Suitable rings were provided for them on the South Common, where the trials and finals were held. Keen rivalry prevailed during the games, and all the contestants had a large following of "rooters". The winner of the contest was given a free trip to Atlantic City, where he competed with the champions of many other cities of the United States.

Our public bath house on the Boulevard was operated again this year in the usual efficient manner, having the same force of assistants and life-guards in charge. Many enjoyed the privileges offered here and it was no uncommon sight to see thousands there on a hot summer day.

Moving picture shows were given during the summer months in different localities of the city four evenings a week, and drew large gatherings, not only of children, but grown-ups as well. This form of entertainment is inexpensive and looked forward to by many.

Winter sports were patronized to their fullest extent last winter, people of all ages taking part in same. Good facilities were offered for skating as well as for using the

toboggan slide at Fort Hill Park. The areas are well lighted in the evening, so that we obtain the maximum use. Of course it is essential to give these sports proper care and attention by our employees of the department, as well as proper police protection, which again make our maintenance charges rise.

RECOMMENDATIONS

That sufficient funds be provided for the completion of the development of O'Donnell Playground, Centralville Playfield and Pawtucketville Playground.

That a play area be acquired in a fast growing community, somewhere between Wentworth Avenue and Clark Road. There are a few desirable open spaces from which a plot could be had at present, far more reasonable than if delayed for future years.

That an additional appropriation be made for the erection of a suitable field house at Shedd Playground. Our funds left from the Shedd Bequest are not sufficient for a building in keeping with the playground development there, when completed.

In conclusion permit me to thank the Board for its support given during the year, employees of the department for their faithfulness, the city officials, the playground teachers, the newspapers, and the public in general for the many kind favors rendered; and the spirit of co-operation that has been shown the past year.

Respectfully submitted,

JOHN W. KERNAN,
Engineer and Superintendent.

REPORT OF THE TRUSTEES FOR 1925

TO THE HONORABLE CITY COUNCIL OF THE CITY OF LOWELL:

Gentlemen:—The Trustees of the City Library herewith present their annual report for the year 1925. The circulation of books for the year showed a total of 263,075. Our report for 1924 showed a total of 204,609. The increase for 1925 of 58,466 was due partly to an increased use of the Library and partly to a new method of estimating the School use of our books.

Heretofore we have reckoned the school circulation by counting once only the books sent to the schools. We find it to be the custom in the Boston Library and in many others to consider that books so loaned are circulated at least once a month. In fairness to our library we are adopting this method of reckoning our circulation and are able to make a better showing. We cannot, however compete with other libraries that have a system of branches. The furnishing of books to be circulated in the schools is becoming an important part of our work and is capable of great expansion. We shall need many more duplicate of our books to supply the needs of the schools.
